Why do people love this pallet so much? Sure, the reason is a five-layer system and three separate memory foam covers!

The upper cover is from Tencel. It is a brand new luxury microfiber. This coverage will ensure that you sleep comfortably, without extra heating.

The next three layers contain memory foam material. First comes the innovative quilted-gel one, which provides superior convenience. The second one is more

common. Gel-memory foam is here to maintain your back as well as your neck. And the adaptive high-core memory foam to bear the entire body of yours.

All layers breathe; they are thick as well as dense at the same time. The very bottom one has a 2.2 ILD rating. The Nectar Memory Foam Mattress is [CertiPUR-US certified](#).

And the result is incredible: you get the body supported during the night, thus your sleep becomes deeper than before. However, people who don't appreciate sleeping on the material that repeats a body contour and lightweight sleepers will find this pallet disappointing.

Conclusions

Nectar products perfectly match customer expectations. If you decide to purchase it, the decent quality will be provided to you. Is there any bonus? Yes, a one-year window to return the pallet if it doesn't fit you.

5-layer mattresses usually cost much more than Nectar Memory Foam one. So this is a good deal. Yet, people whose weight stopped under the sign below 130 lbs will not enjoy dreaming on this pallet. You better consider another option if your body weights are less than 129 lbs.

So, this product is perfectly suitable for those who sleep on the back. So in case you are used in the Log position, you will truly appreciate the Nectar Sleep mattress. So let's give it 4.4 out of 5.0.
