Module 1: Foundations of Student-Centered Assessment Systems

Session 1.1: Our vision of science learning and performance

Participant Agenda and Resource Links

Session Goals
1. Develop an individual and shared vision for science learning and student performance. 2. Compare and supplement our science vision with existing district visioning documents.

Learning and Activities	Resources
Welcome and Opening	● 1.1 Session Slides ● T1-1 Images of Student Success
Building Our Vision	● T1-2 Module 1 Group X Working Slide Deck Template
Closing and Meta-Moment	
Take Action	● Keep your individual vision for science learning and performance close by. Add notes to your vision in your work day or outside school where you see concrete examples of your vision or examples of where your vision is not being met. ○ Before the next session: reflect on your notes. What patterns do you notice? What conditions/contexts best support your vision? Hinder your vision? ● Explore how students perceive education and the future. ○ OECD Future of Education and Skills 2030 The Future we want videos.
