

VS. PROTO BF INTO THE BOYFRIEND-VERSE UNUSED CONTENT

WRITTEN BY RED-BUN

As many of you followers know, BF-Verse has been repurposed into Vs. Proto BF V2 as the idea was too ambitious and the team was not working on it much.

So we decided to create a Google Doc showing off most of the unused content from BF-Verse as well as content from Proto BF V1.

If there's any missing content in the document, it's either lost or we forgot.

In any case, the doc will get updated in the future if they get found or when Proto BF V2 comes out.

With that being said, music will not be included in this document as they will be released separately in a Google Drive folder on twitter.
