## A GIANT LEAP FOR MON KIND

DC WEATHER FORECAST: MILD WITH CLEAR SKIES

Banners unfurl around the stadium as a buzz of excitement fills the air. Residents mill about, dressed up in bizarre get-ups as popular science fiction characters, or dressed to the nines in black suits. Proprietors with goods of all kinds set up booths along the open walkways, their signs, decorated with galactic swirls advertising their products to be "out of this world". Meanwhile greeters hand out moon-studded maps with schedules of the day's programs on them. It is very clear that Space-Con has arrived, the quinquennial celebration of the Kaleidoscope Meteor shower.

# SPACE CRAZE

Every 5 years, the Kaleidoscope Meteors pass over Dome City, causing the barrier to illuminate with a spectacle of dancing lights. The sky glitches into a telescopic lens that magnifies the space rocks a hundred times over, seemingly close enough to reach out and touch. This event brings the city together at the convention for viewing parties and is wondrous to behold.

# SPACE CRAZE

Among the bevy of interstellar sights, panels are held about scientific advancements made in Dome City, along with panels to discuss favorite sci-fi movies, shows, and various other aspects of fandom. There's even regular opportunities for con-goers to participate or perform skits on stage. This year, the headline exhibit is center stage, entitled: "Mon on the Moon", being led by renowned genius, Jasper, the Vademon.
