INTRODUCTION

The introduction is written in Goudy Old Style, size 12, with 1 line spacing. The introduction should contain (1) General academic or background anxiety. (2) Previous literature review (state of the art) as a basis for scientific novelty statements of the article to justify the novelty (there must be references to journals published in the last 10 years. No "library review" is allowed in research reports (thesis, thesis and dissertation), but it can be presented as a review of the previous literature. (3) Gap analysis, a statement of the gap or novelty statement, or the unique difference of this research compared to previous studies, or in terms of the importance of the research, or comparison of uniqueness with previous research. (4) Reserch Question, the problem must be clear and requires research to solve the problem. The body of the paper must be elaborated between 4500 - 9.000 words (maximum) excluding references/bibliography.

RESEARCH METHODS

This method is written in a descriptive style and should provide a statement regarding the research methodology, including the type of research, research approach, data source, and analysis method. The author should explain the mechanism for analyzing the Sharia issues.

This method, as much as possible, gives the reader an idea of the method used; it is optional and only for an original research article. (For Conceptual Ideas without Research Method).

DISCUSSION

The discussion contains theories that assist researchers in analyzing data to make a summary or synopsis of the data and relationships, and to suggest trying new things or even giving birth to new theories. There are at least three functions of theory that have been agreed upon by scientists, namely: (a) describing, (b) explaining, and (c) predicting. The Arabic-Latin transliteration refers to the Arabic-Indonesian transliteration as per the 3 Ministerial Decrees.

The discussion also contains sub-chapters with research results.

This chapter contains research findings and discussion (can be described in sub-chapters). Write down the findings obtained from the results of research that have been carried out, and adequate data must support them. Research results and findings must address the questions/problems and be consistent with the research objectives outlined in the introduction. If there is a table, it is written in the following format:

Footnote

Each time an opinion is quoted, the author must provide a footnote using the **Chicago Manual of Style 17th Edition (full note)**. Please use the Mendeley or Zotero reference manager app.

CONCLUSION

Closing contains conclusions. It should be written in paragraphs, not in numeric or bulleted lists. The conclusion describes the answers to research questions/problems and/or the research objectives or findings obtained. The conclusion does not repeat the results and discussion, but rather summarizes the findings, as expected in the objectives or hypotheses.

SUGGESTIONS

Suggestions present tasks related to further ideas from the research.

ACKNOWLEDGMENTS

Intended to pay gratitude to sponsors, fund bearers, resource persons, and other parties that have important roles in the study. The writer needs to obtain permission from individuals or institutions before mentioning them in the acknowledgements. Editors need not be acknowledged in writing.

AUTHOR CONTRIBUTIONS STATEMENT

The Author Contributions Statement can be several sentences long and should briefly describe the tasks of each author. Please list only 2 initials for each author, without full stops, but separated by commas (e.g. JC, JS). In the case of two authors with the same initials, please use their middle initial to differentiate between them (e.g. REW, RSW).

CONFLICTING INTEREST STATEMENT

This section is a statement from the author that this article has a conflict of interest or not.

AI USAGE STATEMENT

This section is a statement from the author that the use of Artificial Intelligence (AI) tools in this work is strictly limited to supportive functions, and authors are only permitted to use AI for language editing, grammar checking, and improving clarity and readability. AI was not used to generate core ideas, conduct substantive analysis, interpret data, or draw scholarly conclusions. The author retains full responsibility for the originality, accuracy, and academic integrity of the content, and AI tools are not credited as authors or contributors, in accordance with ethical standards in academic publishing.

REFERENCES

All article text references must be listed in the Bibliography section. The bibliography must include references from primary sources (scientific journals) and must comprise at least 80% of the entire bibliography, all published in the last 10 (ten) years. Each article contains at least 10 (ten) reference/bibliography.
