3a-91ba-ac4d0f8bfe0e%22%7d

Participants
- **Corrado Lombardi (4Science)**
- **Riccardo Fazio (4Science)**
- **Jordan Piščanc (University of Trieste)**
- **Florian Gantner (University of Bamberg)**

Agenda:
- DSpace-CRIS Developments update
- Upcoming DSpace 7.3 merge

Meeting notes

An update about some of the current DSpace-CRIS7 features under development has been shared, in particular regarding enhanced layout (tab and boxes) security, correction workflow and Item Authority generators. Slides are available here: DSpace-CRIS 7 Community Call 17.05.2022.pptx

Meeting Questions and Answers
- Any update about development regarding information rendered as "tag" but enabling the user to click them and navigate to a link? Development is part of 4Science backlog, yet to be scheduled.
- Is AddThis component included? Yes, it is already part of a past release. To be enabled an existing AddThis account is needed, its reference must be put in front end configuration.
- Are Altmetric and Dimensions badges available for Person entity? Altmetric and Dimensions badges are available for research outputs. When available, they are integrated among research output lists such as search results and Person's related research outputs in his / her Item details page. Badge available for Person is PlumX, which is displayed when set in layout configuration as per other metric badges and types, and when the person has an ORCID available on PlumX as well.

Next meeting proposed agenda

7th June 2022
