Article history	ABSTRACT
Upload :	The English abstract contains a brief description of the research problem and objectives, research method/approach, and research results. Keywords must be included to describe the domain of the researched problem and the key terms underlying the research implementation. It should consist of a minimum of 150 (one hundred fifty) words and a maximum of 200 (two hundred) words. Keywords can be single words or combinations of words, with a minimum of three to six keywords. Do not present data in the form of numbers.

Publish :	
Keywords: keyword1, keyword2, keyword3, etc.	

INTRODUCTION

The introduction section contains background/issues/problems/urgency and service rationalisation. It also presents the purpose of the activity and the problem-solving plan. Theoretical studies related to the problem under study and hypothesis development (if any) are included in the introduction—citation example (Crosley, 2021).

The introduction section can only contain 10 to 25% of the total article portion.

METHOD

This section explains how the service was carried out. The method is described clearly and in detail, as are the stages of implementation. This section also contains information on service design, service partners, location of activities, participants involved, and an analysis of the method of measuring the success of the service quantitatively, which has scientific value.

The methods section is only allowed to contain 20 to 25% of the total article portion.

RESULTS AND DISCUSSION

This section presents the results of the service related to the objectives. Service results can be equipped with tables, graphs (images), and/or charts. The discussion section describes the results or outcomes of the service in the form of improved skills or the form of products, linking to relevant reference sources, both those that are consistent with the results and those that are counter. The results also suggest the level of achievement of the activity target. If it is an object, it is necessary to explain the product specifications, advantages, and weaknesses. The discussion is sequential according to the order of the objectives and has been explained beforehand. The discussion is accompanied by logical arguments by linking the results of the service with

theory, other service results and/or research results. Possible follow-up activities can also be conveyed in this section.

The results and discussion section contains 55 to 65% of the total article portion.

Figures and Tables

Place the table label on top of the table, while the figure label is at the bottom of the table. When referring to a table, specify a particular table, such as Table 1. An example of writing a table and figure caption is as follows.

Table 1. Table Name (Cambria 11) without vertical lines

Head of table	Table Head Column	
	Sub column head	Sub column head
Line1	Line content1	Line content1
Line2	Line content2	Line content2

Figure 1. Figure Name (Cambria 11) image resolution must be clear

Abbreviations and Acronyms

Common abbreviations, such as CBSA, KS, SI, and MKS, do not need to be described. However, acronyms that are not very well known or acronyms made by the author need to be described. For example, the RAGE (Relaxed, Active, Guided, Effective) learning model is an effort to increase students' poetry creativity.

CONCLUSION

The conclusion summarizes the results and discussion, referring to the research objectives. Suggestions can be made in this section. The conclusion section is only allowed to contain 5 to 10% of the total portion of the article.

REFERENCES

This section must contain a minimum of 25 references. 80% of the references must be within the last 10 years. Using APA format 7th edition. Created using the Mendeley/Zotero application.
