

PEER REVIEW

Please consider the following when assessing a paper for this class, whether it's your own or someone else's:

First, READ THE ENTIRE PAPER before making any comments.

Then, highlight/underline the THESIS. Does it answer **the prompt**?

Trace the argument's development, paragraph by paragraph, checking the following:

- Topic sentence and transition/connection
- Supporting points
- Citations (check against the source and reference page)
- Only afterwards, make comments on DICTION and SYNTAX
- DO NOT attempt to correct grammar and mechanics for another writer!

Think about the **overall structure** of the paper: does it properly introduce the subject, topic, and main points? Refutation? (for Argument)

Is there a proper and effective conclusion?

Check the format of the layout/heading.

- Make sure the font is correct
- Make sure there are page numbers
- Make the date is current and correct

Check the format of the Works Cited page.
