

Wave Research Project Notes

1. Introduction (2 slides)

*What is your topic?

*Why did you choose it?

*Why is it interesting?

2. Body (6 slides)

*Describe your wave (wavelength, frequency, where it comes from, how it is detected, etc.)

*How is your wave similar/different from other waves?

*How is your wave beneficial to humanity?

*How can your wave be harmful?

*What is special/interesting/worth knowing about your wave?

3. Conclusion (2 slides)

*This is where you will restate your topic and summarize your main points, as well as your closing remarks.

4. Works cited (slide at end of slideshow)

*You need 3 sources, with 1 quote from each one if you wish
