NATIONAL FEDERATION OF POSTAL EMPLOYEES

1st Floor, North Avenue Post Office Building, New Delhi- 110001

Ref: PF/NFPE/CBS

Dated – 02.07.2014

To

SHRI RAVI SHANKAR PRASAD JI
Hon'ble Minister of Communications &
Information Technology
Sanchar Bhawan, 20, Ashoka Road
New Delhi - 110001

Sir,

Sub: - Core Banking Solutions in Post Offices – Vendors M/s INFOSYS & M/s SIFY made it a mess – Agitated Public attack Post Office Staff – Department issues instructions to seek police protection – Urgent intervention requested.

Hon'ble Prime Minister of India, Shri Narendra Modiji, while addressing the meeting of Secretaries of all Govt. Departments, made it amply clear that **"the efforts of the staff and officers should be aimed at reducing inconvenience to the customers and rendering prompt and courteous service. The focus should be on enhancing productivity and effectiveness rather than wasting time and effort on unproductive tasks."** We are sorry to state that in the Postal Department, just the opposite is happening.

We are constrained to bring it to your kind notice regarding the flaws in Core Banking Solutions migration of Postal saving Bank and savings certificates which is the first phase to be followed for full on-line banking activities and insurance. We humbly request to bestow immediate attention to resolve the technological issues as the CBS migrated offices are now facing incalculable miseries and untold sufferings due to lack of adequate network capabilities and software support of M/s Sify & M/s Infosys.. The following are the issues to be set right in war foot manner at the initial stage itself otherwise leads to chaos and distress among the stake holders especially the working staff and public. **In fact the entire functioning is in standstill and the general public coming to the Post office are very much agitative for no fault of the employees.**

1) Insufficient bandwidth Network:

Providing of strong and stable network is base of successful implementation of India Post project. Now almost all HOs have been given 2 MBPS bandwidth line, LSG SOs 512 KBPS line and B and C class offices have been given 256 KBPS line. If 'India Post Project-2012' is fully implemented, all the work of Post Offices will depend on these network. Present bandwidth speed is very less and due to low bandwidth, Finacle page is either not opening or some time opening very slowly. Due to this PO staff are forced to work up to night 10 PM many days. In many occasions in every CBS migrated office, the 'Login' is inconsistent and for each transaction "Login" is forced.

If CSI and PLI are migrated and placed on this network the situation may further worsen. Hence we request to provide at least 4 MB bandwidth line to HOs, 2 MB bandwidth line to LSG SOs and 1 MB bandwidth line to B and C class offices.

migrated office, the 'Login' is inconsistent and for each transaction "Login" is forced.

CBS

If CSI and PLI are migrated and placed on this network the situation may further worsen. Hence

request to provide at least 4 MB bandwidth line to HOs, 2 MB bandwidth line to LSG SOs and

we

bandwidth line to B and C class offices.

1 MB

2) Failure of M/s Sify:

In India Post Project 2012, NI Vender is M/s Sify. On observation of quality and quantity of service being provided by them it is very much proved that M/s Sify is incapable to give service to this big department. They do not have sufficient skilled manpower and it seems that they are not intending to give good quality service also. At initial stage itself they have not made proper survey of all offices. Before installing and commissioning they were very keen on taking installation report from concerned Postmasters/Sub Postmasters.

It is told that, as per MOU, all offices should be provided with NSP-1 and NSP-2 lines. In almost all offices, NSP-1 is BSNL line and NSP-2 is either Sify line or Airtel datacard. It is observed that in many offices they have installed Airtel datacard ,where as Airtel signal is not available at that place.

It is also observed that M/S Sify is not recharging Airtel datacard installed. Instead they are recharging on receipt of complaint from concerned offices. By doing this they are deviating from MOU and leaving the staff in the field in distress.

3) Finacle Problem:

If we come to Finacle part, it is another tragedy. Initially it was boosted that Finacle is fully foolproof software and successfully implemented in many banks. We could not understand why Infosys is not utilizing experience gained in banks and implementing here. **There are so many bugs in the software and more surprisingly even after lapse of 6 months of implementation, nothing is changed. All the issues raised at the time of January-2014 is still not resolved. Moreover Finacle server becomes inaccessible many time in peak business hours or responds very slow. It is a naked truth that we are losing clientele and distancing from the customers only due to faulty service of vendors.**

4) Lack of Guidance:

No separate rulings are received to suit Finacle Environment. No authorities are giving authoritative guidance on many issues.

For example

- Role of SOSB in HO after implementation of Finacle at SOs,
- Role of SBCCO at HO
- Fate of manual records on transfer accounts from one Finacle office to other etc.

5) Supply of Printers and Computers:

At initial stage new Computers and printers are supplied to pilot offices. Rest of the offices are having more than 5 year old Computers and Printers which are not suitable to present scenario. Administration is pressing hard to migrate offices without supplying required hardware. The old computers and peripherals either to be revamped or replaced to make it compatible to the present environment.

6) Problem of User credentials:

One each User credential is given to trained staff. But it is not clearly told what action to be taken while SPM/PA goes on leave especially in B class offices. As sharing of user credential is very risky and dangerous, alternative arrangement should be made immediately.

7) Due to slow network and frequent failure of server customers of the department are frustrated and moving out the department and needed immediate attention.

2) Failure of M/s Sify:

In India Post Project 2012, NI Vender is M/s Sify. On observation of quality and quantity of service being provided by them it is very much proved that M/s Sify is incapable to give service to this big department. They do not have sufficient skilled manpower and it seems that they are not intending to give good quality service also. At initial stage itself they have not made proper survey of all offices. Before installing and commissioning they were very keen on taking installation report from concerned Postmasters/Sub Postmasters.

It is observed that in many offices they have installed Airtel datacard ,where as Airtel signal is not available at that place.

It is also observed that M/S Sify is not recharging Airtel datacard installed. Instead they are recharging on receipt of complaint from concerned offices. By doing this they are deviating from MOU and leaving the staff in the field in distress.

3) Finacle Problem:

If we come to Finacle part, it is another tragedy. Initially it was boosted that Finacle is fully foolproof software and successfully implemented in many banks. We could not understand why Infosys is not utilizing experience gained in banks and implementing here. There are so many bugs in the software and more surprisingly even after lapse of 6 months of implementation, nothing is changed. All the issues raised at the time of January-2014 is still not resolved. Moreover Finacle server becomes inaccessible many time in peak business hours or responds very slow. It is a naked truth that we are losing clientle and distancing from the customers only due to faulty service of vendors.

4) Lack of Guidance:

No separate rulings are received to suit Finacle Environment. No authorities are giving authoritative guidance on many issues.

For example

- Role of SOSB in HO after implementation of Finacle at SOs,
- Role of SBCO at HO
- Fate of manual records on transfer accounts from one Finacle office to other etc.

5) Supply of Printers and Computers:

At initial stage new Computers and printers are supplied to pilot offices. Rest of the offices are having more than 5 year old Computers and Printers which are not suitable to present scenario. Administration is pressing hard to migrate offices without supplying required hardware. The old computers and peripherals either to be revamped or replaced to make it compatible to the present environment.

6) Problem of User credentials:

One each User credential is given to trained staff. But it is not clearly told what action to be taken while SPM/PA goes on leave especially in B class offices. As sharing of user credential

is very risky and dangerous, alternative arrangement should be made immediately. 7) Due to slow network and frequent failure of server customers of the department are frustrated and moving out the department and needed immediate attention.

8. You may aware that we are struggling with outdated Computers and peripherals, which were purchased during the year 2000 to 2005 and immediate supply of needy new hardware to ensure the technological transformation in an effective manner.

9. Even proper up gradation of CPU is not made in many areas and the Software loaded is upto Windows XP in most of the offices. Presently it is a fact that windows XP is not supported by the Microsoft with updates.

10. Finacle can be better loaded with Windows 7 and hence the officers at ground level are pressurized to use pirated version of Windows 7, which may lead to litigation with Microsoft apart from non supporting with updates.

11. The MOU made with M/s Sify, for net work integration is limiting to low bandwidth such as 256 Kbps to 512 Kbps in many areas, serving with 1 server and 4 to 5 nodes, resulting in sluggish connectivity and takes hours together to transform the data. This results in hang over and the transactions could not be able to be made at the instant, as the Department expects, It requires atleast 2 to 4 Mbps and **M/s Sify refused to increase the bandwidth now.**

12. Further in the Data Centre, it requires to the level of 400 Mbps on the Network to receive the Data transmitted at a time from all the 680 offices but Sify is learnt to be provided with a minimum of 200 Mbps capacity. This affects the receipt of data from the end users at a time and take hours to complete the process. Further expansion is required when there is further migration.

13. The area of occupation in the main server at Mumbai maintained by M/S Reliance Ltd. is also not sufficient, which results in sluggish transmission of data from the entire 680 offices at present, at a time and even the validation cannot be made before 8:00 PM or 10:00 PM on all the days.

14. End of day process cannot be made even on daily basis and the staff have to wait for the nod from the Infosys even after midnights on several days and at times it can be made on the next day morning. Even the women employees are compelled to complete the EOD process in midnights and their husbands or wards waiting till midnights to take them to home.

15. Even the Help desk provided is not answering and the end users are taken to task and receiving brick bats from the irate public.

16. This results in closing of accounts in large numbers that too, can be made not on the date of presentation but after few days and our Department loses large chunk of customers, because of the miscalculations, wrong estimations and over ambitious activities and inadequate technological support.

17. Even the first and prestigious ATM of our Department unveiled by the ex Finance Minister Sri. P. Chidambaram at T. Nagar HO is not functioning from the date of installation and only 10 ATM cards are supplied on the first instant, that too only to the staff and some friendly users of T. Nagar HPO. But the ATM is provided with 24x7 A/C and a paid Guard, making huge loss to the Department and receiving severe criticism from the Print media.

18. The women employees should be relieved from this area of operation, till the situation improves, in order to avoid late night stays at offices inviting gender problems and unsafe returns to their home at midnights.

8. You may aware that we are struggling with outdated Computers and peripherals, which were

purchased during the year 2000 to 2005 and immediate supply of needy new hardware to ensure the technological transformation in an effective manner.

9. Even proper up gradation of CPU is not made in many areas and the Software loaded is upto Windows XP in most of the offices. Presently it is a fact that windows XP is not supported by the Microsoft with updates.

10. Finacle can be better loaded with Windows 7 and hence the officers at ground level are pressurized to use pirated version of Windows 7, which may lead to litigation with Microsoft apart from non supporting with updates.

11. The MOU made with M/s Sify, for net work integration is limiting to low bandwidth such as 256 Kbps to 512 Kbps in many areas, serving with 1 server and 4 to 5 nodes, resulting in sluggish connectivity and takes hours together to transform the data. This results in hang over and the transactions could not be able to be made at the instant, as the Department expects, It requires atleast 2 to 4 Mbps and M/s Sify refused to increase the bandwidth now.

12. Further in the Data Centre, it requires to the level of 400 Mbps on the Network to receive the Data transmitted at a time from all the 680 offices but Sify is learnt to be provided with a minimum of 200 Mbps capacity. But the ATM is provided with 24x7 A/C and a paid Guard, making huge loss to the Department and receiving severe criticism from the Print media.

18. The women employees should be relieved from this area of operation, till the situation improves, in order to avoid late night stays at offices inviting gender problems and unsafe returns to their home at midnights.

19. Further, adequate hardware and infrastructure should be given immediately to the CBS migrated offices with sufficient man power and proper remuneration for the extended hours, the staffs re serving.

20. In spite of all above cited problems the Postal staff are being at work on finacle software as matter of challenge and trying to give best services to the customers. In spite of all efforts the customers are not satisfying/delighting which hampers the reputation of the department. No Post office which is upgraded with finacle are being closed before 8 PM every day. We are ready to work hard provided, solution for above problems are to be solved.

It is requested to the Hon'ble Minister to intervene immediately and give immediate instructions to all concerned so as to restore the customer faith and also efficiency of the Postal operations.

It is requested to sort out all the issues arising out of the CBS Migration and all the vendors need to be instructed to provide all the technological support as required by the field staff. As this is the pilot and starting stage, if we failed to pull up the vendors to the level of expectation and necessity, later full implementation, restoration may be difficult with this vendor support.

It is further requested to spare some time and provide opportunity to present and brief our case in person for the welfare of our Postal department, staff and the clientle.

We hope and eagerly awaiting action against the Vendors to pull up them to stabilize the Core Banking operations as Post offices now at stake in its start of CBS.

A line in reply is highly appreciated.

With profound regards,

Yours faithfully,

(M. Krishnan)
Secretary General
