

Access to Language Audiological Subcommittee (AtLAS), aims to ensure access to and use of audiological services for all DHH children from birth to 22 years old.

"Alone we can do so little; together we can do so much." – Helen Keller

AtLAS SMART Goal Worksheet

Team Name: _____

Facilitator: _____

Date: _____

Goal Title:

Specific:

What exactly do we want to accomplish? Who is involved? Where will this happen? Why is it important?

Measurable:

How will we know we've succeeded? What metrics or milestones can we use?

Achievable:

Is this goal realistic given time and resources? What support or partnerships do we need?

Relevant:

How does this goal support our mission to expand access to hearing aids for children?

Time-bound:

What is our deadline? What are the key milestones along the way?

Why This Matters (connect hearts to the mission)

Atlas Mission: The Access to Language Audiological Subcommittee (AtLAS) ensures access to and use of audiological services for all DHH children from birth to 22 years old as determined by parent and child choice. Specifically, this will be accomplished by:

- Ensuring access to and use of audiological services for DHH children (birth to 22 years old) as determined by parent and child choice.
- Increasing knowledge of families and Georgia professionals who interact with families with DHH children about audiological management and intervention services
- Improving access to audiological management and intervention services for families whose focus includes their children’s acquisition of listening and spoken language skills.
