

Peterborough Energy Committee Minutes

September 13, 2023

Present: Emily Manns, Jim Hassinger, Anne Huberman, Joel Huberman, Bruce Tucker, Steve Walker

Fire Station Preliminary Energy Model

Almost all of this meeting was devoted to a discussion of this document: Peterborough [Fire Energy Modeling PRELIMINARY 9-6-23](#) that was shared with us by Paul Leveille of [Resilient Buildings Group](#). Paul, who is working as a consultant to the Fire Station architects, invited us to fill in the “As Proposed, Option B” column of this document. We had a lot of ideas.

After gathering ideas for the Option B column, we next went over the list we had made earlier of our ideas for the Fire Station design and thought about which ones would be practical.

We plan to impart all of these ideas to Paul at a future meeting.

DPW Garage

We need to find more information about solar canopies. It has been hard to find a supplier. And we wonder about keeping the old Motor Pool building. Wouldn't it make more sense to replace it with solar canopies? The fire station wants four parking spots in it, and canopies could work just as well.

Letter to DOE in Support of NHSaves

We received a request to write a letter to the DOE in support of NHSaves. We will find out if it is too late.

Next Meeting

We will meet next on Wednesday, September 27, at 3:30 PM at the Library.
