

15 November 2017

Vim core syntaxes

- DONE: fasta, fastq, bed (near-complete), but no column-selection
- IN-PROGRESS: pdb (working framework), vcf (will start soon)

Gedit core syntaxes

-

Less core syntaxes

- DONE: sam (required features are listed)
- IN-PROGRESS: vcf (optimization issue)

Installers

- Sublime: create a package and submit to PackageControl
- Gedit: ""
- Vim: create installer script
- Less: ""

Publication

- Need to follow author guidelines to be considered an author (contribute enough)
- Funding: hackseq is helping us out more but not enough. Go to ecoscope once we have a manuscript

Theme

- One for dark, one for light
- Add IUPAC colouring

Documentation

- Everyone should contribute

Testing

- Recruit beta-testers to WEBSITE
- Test optimization for all syntax files
