

Precision Bass 75th Anniversary Artist Quotes

Bob Glaub

- *"Fender bass is like the bass you think of when you go to pick a bass."*
- *"It's magic and it really has no limits."*

Freddie Washington

- *"When I started playing P-Bass, I was hearing this sound on records... I was hearing this thick, rich sound. It had a profound effect on how I play coming from the upright bass. It inspires me to play the way I play, the way it sounds, the way it feels. I've played on a lot of different records, and I've played lines on records that I probably wouldn't play this way if it was another bass. This bass has given me the ability to go places that I can go any time I want to go."*

Geezer Butler:

- *"I tried other basses, but nothing had the balance of a P-bass. It becomes part of you."*

Justin Bivona

- *"People keep reaching for [P Bass] because they're tried and true. It's never going to fail you. You know exactly what you're going to get. And there's still always room to experiment with them."*

Lee Sklar:

- *"It really made the lives of bass players change. It made the lives of audiences change. It really changed all our lives as bassists."*

Matt Freeman

- *"People keep using it [P Bass] because it's really good, it sounds like it's supposed to sound... and it cuts through. You can make these things sound like anything. I mean, you plug it in, and it works every time, and it stays in tune - it just has that sound for whatever it is. It just works."*

Nate Mendel:

- *"This [P Bass] is like the center of gravity for the bass world."*

Tal Wilkenfeld

- *“The idea that the electric bass is only 75 years old is amazing to me. It's such a baby compared to every other instrument. So there's so much more to explore on the P-bass”*
