

Data analysis, data analysis, data analysis, data analysis, data analysis, data analysis, data analysis, data analysis, data analysis, data analysis, data analysis.  
Etc.

This section provides all the methodological details necessary for another scientist to duplicate your work. For the qualitative research this part can be different.

„Research Methodology“ chapter should convince a reader that this manuscript presents a solid and sound analysis.

## RESULTS AND DISCUSSION

### Results

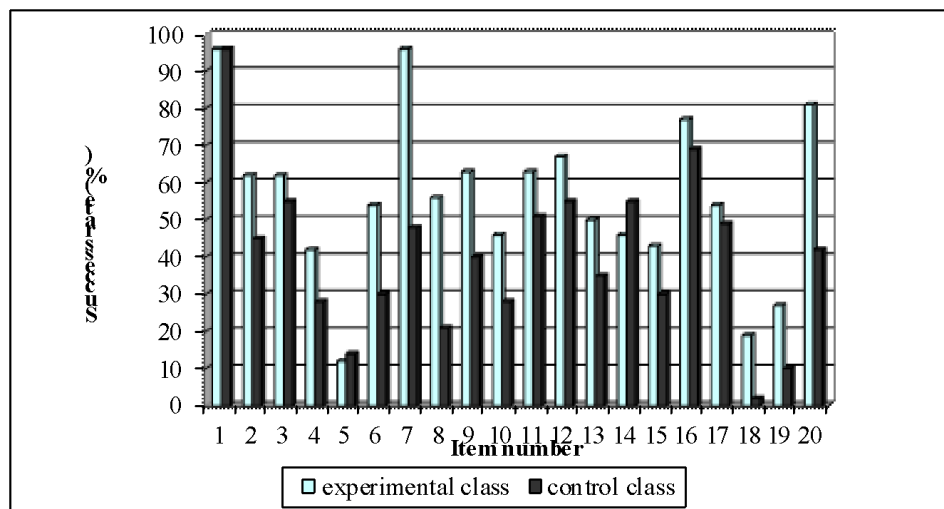

Research results, research results, research results, research results, research results, research results, research results.

**Table 1.** Tables and figures should be valuable, relevant, and visually attractive.

Statements and subscales	Cronbach- $\alpha$	KMO	L	r/itt	Dissemination %
XX	x	x	x	x	%
XX	x	x	x	x	%

Sub-titles (Subchapters) 12-, Centered

Figures should be *carefully* explained in the text and cited in numerical order.

**Figure 1.** Comparison of success rate of items in the experimental and control class.

accepted knowledge, if appropriate. Suggest future directions for research, new methods, explanations for deviations from previously published results, etc.

The objective here is to provide an interpretation of your results and support for all of your conclusions, using evidence from your experiment (research) and generally accepted knowledge, if appropriate. Suggest future directions for research, new methods, explanations for deviations from previously published results, etc.

The objective here is to provide an interpretation of your results and support for all of your conclusions, using evidence from your experiment (research) and generally accepted knowledge, if appropriate. ## CONCLUSION

**Fundamental Finding:** Your conclusion should be the best part of your paper. A conclusion should: (1) stress the importance of the thesis statement, (2) give the essay a sense of completeness, and (3) leave a final impression on the reader. **Implication:** Your conclusion should be the best part of your paper. A conclusion should: (1) stress the importance of the thesis statement, (2) give the essay a sense of completeness, and (3) leave a final impression on the reader. **Limitation:** Your conclusion should be the best part of your paper. **Future Research:** Your conclusion should be the best part of your paper. A conclusion should: (1) stress the importance of the thesis statement, (2) give the essay a sense of completeness, and (3) leave a final impression on the reader.

## ACKNOWLEDGEMENTS (OPTIONAL)

Acknowledgements of people, grants, funds, etc should be placed in a separate section not numbered at the very end of the paper.

## AUTHOR CONTRIBUTIONS

Each author must clearly describe their role in the preparation of this article, referring to the Contributor Roles Taxonomy (CRediT). For example: **Binar Kurnia Prahani** contributed to the conceptual framework, research design, and validation process; **Hanan Zaki Alhusni** was involved in methodology development, data analysis, sourcing references, and drafting the manuscript; **Rahmatta Thoriq Lintangesukmanjaya** handled data management, project coordination, and manuscript drafting. All listed authors have reviewed and approved the final version of this submission.

## CONFLICT OF INTEREST STATEMENT

The authors confirm that there are no conflicts of interest, either financial or personal, that may have influenced the content or outcome of this study.

## ETHICAL COMPLIANCE STATEMENT

This manuscript complies with research and publication ethics. The authors affirm that the work is original, conducted with academic integrity, and free from any unethical practices, including plagiarism.

### STATEMENT ON THE USE OF AI OR DIGITAL TOOLS IN WRITING

The authors acknowledge the use of digital tools, including AI-based technologies, as support in the research and writing stages of this article. Specifically, [Tool Name 1] was employed for [purpose 1], [Tool Name 2] assisted with [purpose 2], and so on. All outputs generated with digital assistance were critically evaluated and revised to ensure academic rigor and ethical standards were upheld. The final responsibility for the manuscript rests entirely with the authors.

**Note:**

- 1. Reference must contain at least 30 scientific journal articles (Last 10 Years ) for primer data.**
- 2. Reference must contain at least 50 scientific journal articles (Last 10 Years ) for secondary data.**
3. Originality is very important aspect of a research paper. Take great care to avoid plagiarism in your writing and be sure that any text you pull from outside sources is properly quoted and noted in your list of references.
4. A qualitative scientific paper is a description of an event, activity, observation, research or experience. The structure of a qualitative paper includes an abstract, introduction, background to the problem, the researcher's role, theoretical perspective, methodology, ethical considerations, results, data analysis, limitations, discussion, conclusions and implications, references and appendix.
