

USE CHATGPT

Prompt :-

Apply a cinematic night-flash aesthetic while preserving every original detail. Do not alter the subject's face, hair, identity, pose, framing, lens, or composition. Keep a dark nighttime environment with existing shadows and background intact. Use a strong warm front flash on the face and upper body so the subject is the brightest element. Add high contrast, subtle bloom, light haze, gentle peach skin glow, soft backlit hair strands, and slight foreground depth. Face, hair, pose, and composition must remain 100% identical.
