

If you are a charlatan or an angry client, or something seems to you that we are allegedly violating your rights, and you want to report an alleged copyright violation, before you do this, remember!

We have absolutely all working, project , files, and sounds in archived form.

.max .sbsar .zbrush .Psd .wav .fbx .ssa .spp .casc . als

and we can provide them to Marketplace employees or support at any time, in case they are needed.

We already have this experience, so remember, you have 0% chance to report copyright infringement.

we can prove that all content was made in our studio.

Thanks for your time.
