

Whole House Water Purifier – SGC-635

The SGC-635 Whole House Water Purifier is a high-capacity water softener and purifier designed for larger households or villas. It delivers a continuous supply of purified, softened water suitable for drinking, bathing, washing, and hot water circulation.

With advanced automatic backwash technology, this system operates maintenance-free — no filter changes or manual cleaning required. The larger tank size and higher flow rate make the SGC-635 ideal for homes with multiple bathrooms or high water usage needs.

Key Features

- Powerful solution for large homes or multi-point water systems
- Simultaneously produces purified and softened water
- Perfect for whole-home use, including showers, kitchens, and laundry
- No filter replacement required – fully automatic backwash system
- Durable and high-flow design for consistent performance
- AC220V powered with strong purification pressure
