

3rd & 4th - Principal digit
 2nd & 5th - Rep. by Small dew
 claws
 (each contains one or
 two small bones)

BOVINE

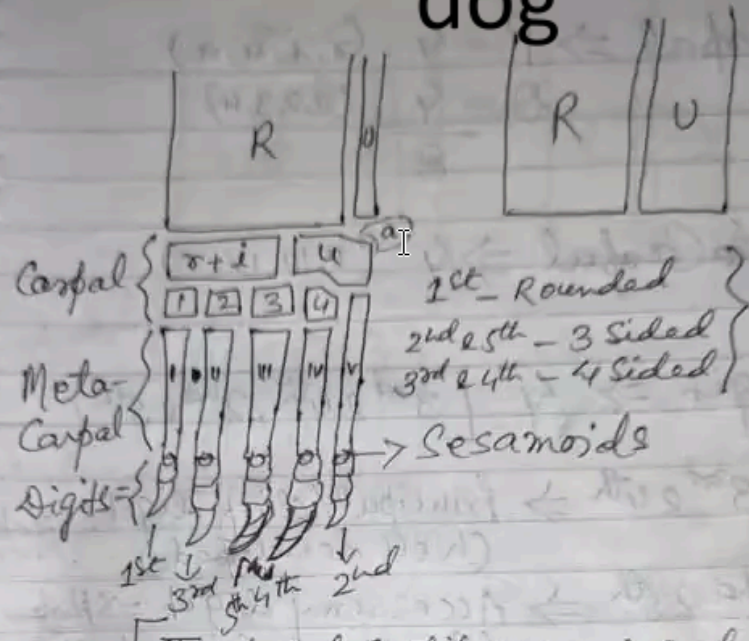

Phalanges - 6 (2x3) One leg
 each)

Sesamoid - 6 < Prox. = 2 2
 Distal = 1 1
 3 + 3
 = 6
 (each leg)

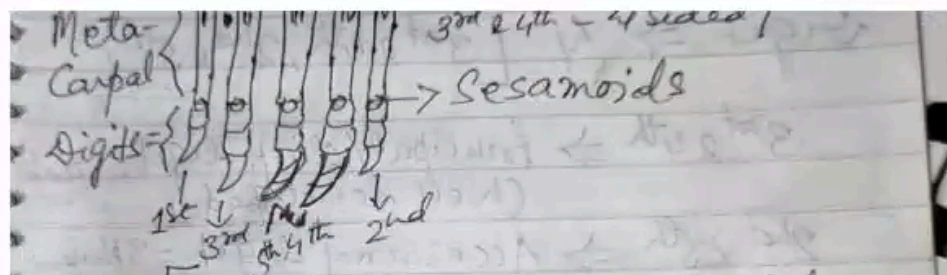

CANINE

dog

[The dorsal Carpaligenous nodule are
also located in both 1st and 2nd phalanges]

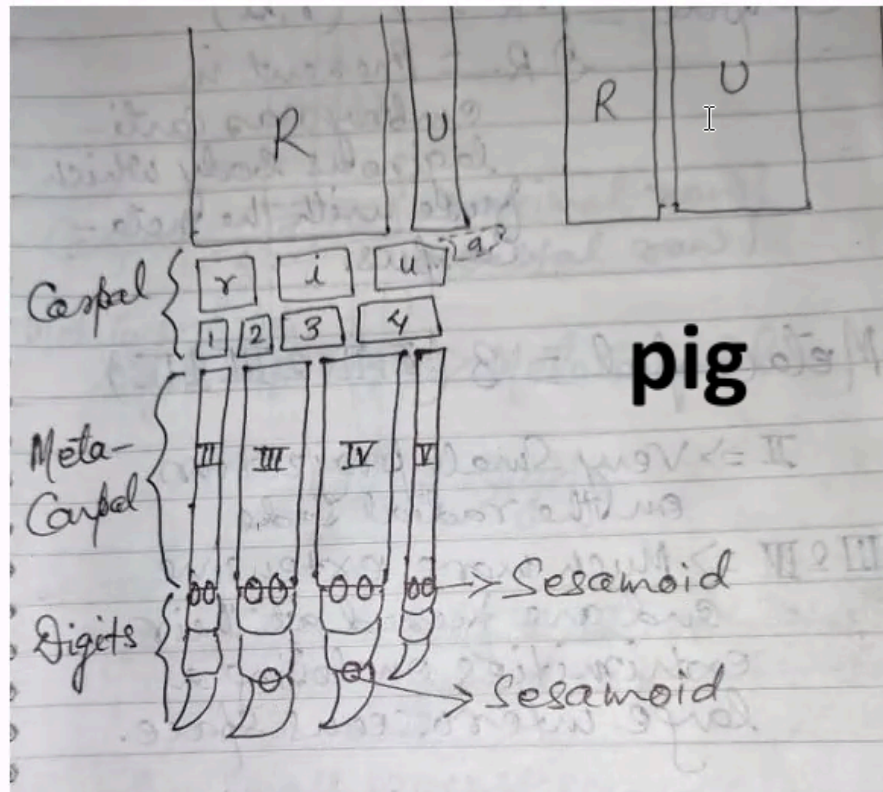

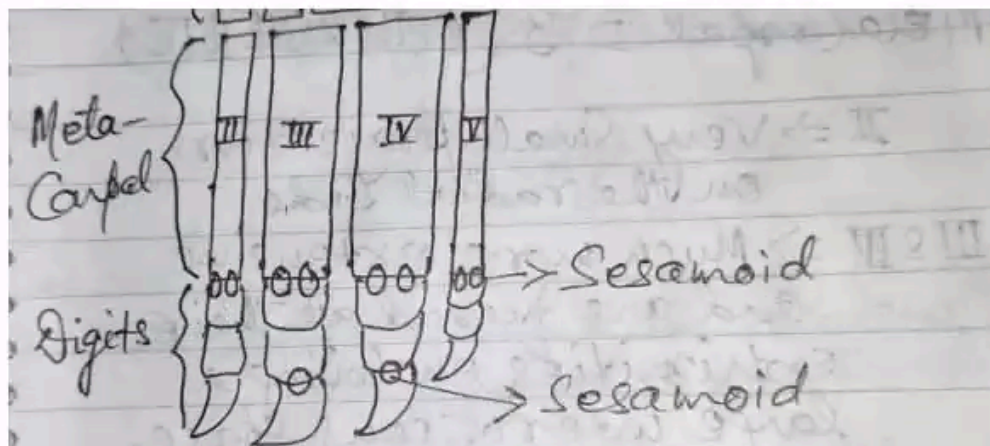

[The dorsal cartilagenous nodule are also found in betⁿ 1st & 2nd phalanges]

Sesamoid = 9 volar Sesamoids are usually present

Two are found at each metacarpo-phalangeal joint of the chief digit. They are high and narrow. 1st digit - Single flattened Sesamoid. (exceptionally two)

= The distal volar (saddle)

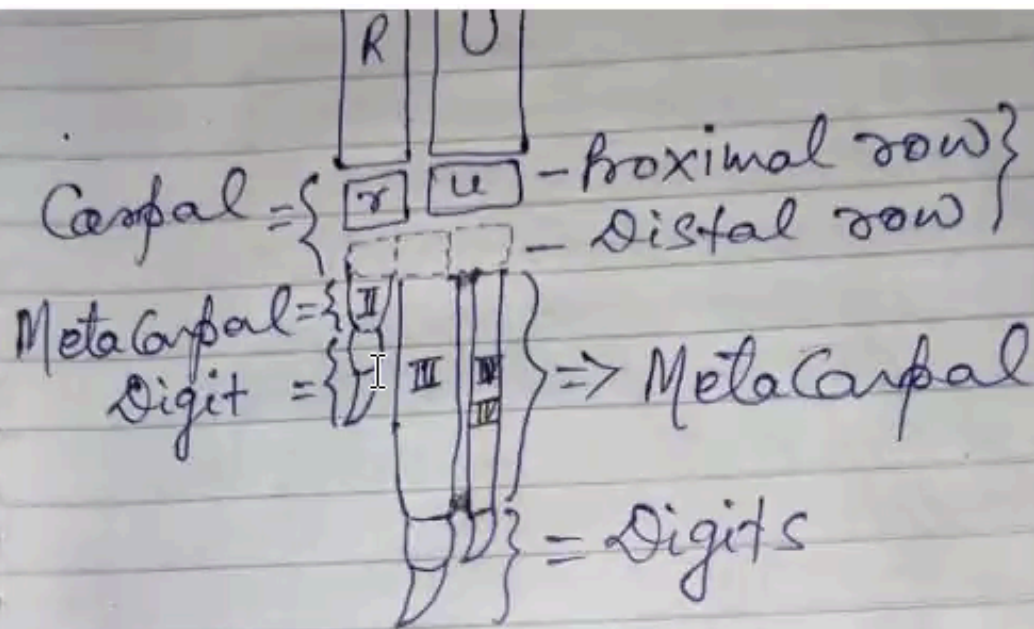

Metacarpal = 4

III & IV $\Rightarrow$ Large, carry chief digit

II & V $\Rightarrow$ Smaller, carry accessory digit

Metacarpal = 3 (I, II, III), which are fused to form single mass.

II - Small projection
 III & IV - Fused at both extremities enclosing a narrow, elongated
