

THE STRONG CABLE OF CHRONOLOGY

THE world has had many systems of chronology. Among these were the systems of Nabonassar, Macedon, Alexander, Tyre, Rome, the Jews, Creation, Diocletian, Christ, Armenia, Persia, the Hindu, and the Chinese, each counting from some national event and covering certain eras. These systems may be likened to chains or to strings of beads, each date being a link or unit in the whole. The relations existing between the dates have been that each date has been so many years after the preceding and so many years before the succeeding dates. An error in any one of these units upsets either all previous dates or all or some of the later ones.

Much reliance is still placed by historical writers upon some of these systems. The chronology of the Assyrian nations has been founded upon comparisons of events with the so-called Canon of Ptolemy, which was a string of dates which the Greek historian arranged centuries after the events, and which has been found full of inaccuracies. The Greeks every four years celebrated athletic games called Olympiads, the succession and number of which were quite faithfully preserved; and events in Greek history were recorded as taking place in such and such an Olympiad, often with the year in the Olympiad—first, second, third, or fourth—in which instances the date of an event, if correctly recorded in the ancient histories, can be relied upon to a considerable extent.

OTHER SYSTEMS ARE CHAINS, NOT CABLES

Every chronology which consists of a mere string of dates is to be relied upon only as each successive date is correct. No known secular chronology has the entire system firmly knit together by connecting-links between dates which are not successive. Every chronology would be immensely strengthened if it were possible to say concerning each of the chief dates that it was, for example, 1,000 years after another event, 500 years after another, 200 years before another, and so on. Each such line of evidence would tend to establish the more firmly the correctness of the chief dates, and through them the intermediate ones. But such proofs of truth are lacking in the secular chronologies, and especially in periods of antiquity. All secular chronologies are mere guesses when they attempt to set dates for much more than a few hundred years before Christ.

The chronology of present truth is, to begin with, a string of dates, like other chronologies. That is to say, the dates are each known to be so many years before and after the succeeding and preceding dates, each step being proved by the most reliable evidence in existence. But if this were all the proof of the trustworthiness of the chronology, it could not truthfully be claimed to be more reliable than are the secular chronologies. Thus far, it is a chain, and no stronger than its weakest link.

There exist, however, well established relationships among the dates of present-truth chronology. These

internal connections of the dates impart a much greater strength than can be found in other chronologies. Some of them are of so remarkable a character as clearly to indicate that this chronology is not of man, but of God. Being of divine origin and divinely corroborated, present-truth chronology stands in a class by itself, absolutely and unqualifiedly correct.

INCONTESTABLY ESTABLISHED

When a date is indicated by several lines of evidence it is strongly established. The scientific law of probabilities imparts a united strength to the strands of the cable of chronology far greater than the sum of the individual lines of evidence. This is a law which is implicitly relied upon in important affairs: viz., that when a thing is indicated in only one way it may be by chance; if it is indicated in two ways, it is almost certain to be true; and if in more than two ways, it is usually impossible that it is by chance, or that it is not true; and the addition of more proofs removes it entirely from the realm of chance into that of proven certainty.

This principle is applied daily in the weightiest matters in courts of law. The testimony of a single witness may be considered doubtful, but that of only two or three witnesses incontestably establishes the truth. "In the mouth of two or three witnesses shall every word be established."—2 Corinthians 13:1.

In the chronology of present truth there are so many inter-relationships among the dates that it is not a mere string of dates, not a chain, but a cable of strands firmly knit together—a divinely unified system, with most of the dates having such remarkable relations with others as to stamp the system as not of human origin.

The automobile and the law of gravitation are two remarkable things. The one was invented by man; the other was discovered by man. Man invents man-made things, but discovers divinely-created principles. Present-truth chronology is not an invention; it is a discovery. The various discoveries, unite into a scientific system of chronology akin to the systems of science in physics, chemistry, radiology, and astronomy.

The matter of chronology becomes worthy of the close attention of able minds, because it supplies the data for a genuine philosophy of history. There is a science of history taught by able and highly educated professors in great universities, but in a vague and confused manner; for it is the attempt to reduce to order the utter confusion which demon control has made of human affairs in this present evil world. If such men find the extremely obscure philosophy which they teach, and concerning which they write in textbooks, worthy of a lifetime of study, how much more worthy of attention is the definite, clear-cut and truly scientific philosophy of history discernible in the chronological system of divine truth.
