

Submission Procedures

All authors must submit their articles at the Lamintang Online Journal submission site in a format defined by the author guidelines. Only a single .word file containing all text, figures, tables, and supporting information is required for initial submissions.

The corresponding author must include the following information for each coauthor: author order, first name, last name, email, and institution.

Submitted manuscripts are pre-screened by plagiarism detection software both before and after blind peer review, prior to acceptance.

The journal allows the author to track and participate in all activities related to the processing of the manuscript, such as the review process, copy editing, layout editing and proofing of manuscripts, which are all managed online.

The publisher utilises multiple communication channels such as email, text messaging and telephone calls, with the intent to provide status updates and action requests for authors. For this purpose, we ask that authors frequently visit their user profile and update it with the latest contact information.
