

Custom HTML5 Video Player - CuteSu - VideoJS Custom Skin Implementation

Today we will add an stylish player to our html5 (simple player)

In 3 Steps---

You can see the demo here

Let's Add this or implement this...

Steps :-

```
<video  
id="my-video" class="video-js"  
controls poster="https://cdn.plyr.io/static/demo/View_From_A_Blue_Moon_Trailer-HD.jpg"  
data-setup=" loop">  
  
<source src="https://cdn.plyr.io/static/demo/View_From_A_Blue_Moon_Trailer-1080p.mp4"  
type='video/mp4'/>  
  
</video>
```

This is simple Video Tag

Go to know more about video Tag...

We have a sample video :-

https://cdn.plyr.io/static/demo/View_From_A_Blue_Moon_Trailer-1080p.mp4

Let's Do it...

We added video...

Next add cdns

Here we got a video player...

You can also use our other video players ...

Link will be in Description...

Thanks for watching till last...
