

#Synth4Senate Campaign Platform

Friends, Citizens of Voopmont. I have plans to run for Voopmont once again. I have already been your senator for 2 terms, and I plan on being your senator for the next. Below is what I will accomplish as your Senator of Voopmont once again.

Economic Plan

Here is what I plan to do to keep Voopmont's economic industry afloat and allow us to prosper more than ever.

The Central Bank of Vooperia has been a big help in allowing our companies to flourish and do well. I believe that they are a necessity in order to keep our companies afloat. I will increase the amount of banks in Voopmont by creating bank-friendly bills that allow them to flourish. These bills will include:

- Allowing banks to operate within all of Voopmont.
- Allowing banks in Voopmont to receive loans from the Central Bank of Vooperia, which they will then loan to the people and other companies within the district.
- I will make sure that the National MOF is monitoring these banks and making sure that no corruption occurs within the banks.

Having banks in Voopmont attracts more people and companies that will live in Voopmont and make a new life for themselves here. I plan on making sure that companies are not corrupt and do not mislead their shareholders. I plan on doing this by:

- Creating a bill that makes companies stationed in Voopmont release their company's profits and value each week, which will be enforced by the District Ministry of Finance.
- Creating a bill that makes companies stationed in Voopmont allow their shareholders to receive weekly profits. This will be optional, and companies do not have to do this.

Doing these things will ensure that the people are being notified of what their company is doing with the money they give to that company, and allow all of Voopmont to prosper with no corruption included.

Militaristic Plan

My plan for the Militaristic part of Voopmont is to increase security, and ensure that all Voopmontians are safe. After what happened in New Vooperis, we cannot afford any sort of terrorist attack on our lands, or we will be risking Voopmontian lives.

I have already created a Voopmont Doomslayer that protects all Voopmontians. However, this may not be enough when it comes to domestic terrorism. My solution to this is as follows:

- I will tighten border security around Voopmont by creating a District Ministry of Defense.
- It will be the DMOD's job to increase the border security and make sure that everyone is scanned before they come into the lands of Voopmont.
- The DMOD will be elected monthly, 2 days after the Governor's election. It will be the Governor's job to ensure that these elections happen.
- The DMOD will be impeachable by the people of Voopmont.

Doing these things will ensure that Voopmont is protected tightly and securely. As your senator, I will ensure that this happens. This is most likely going to be one of the most important things that will need immediate attention.

Environmental Plan

The environment of Voopmont is a large factor in what makes us so great. To sandy beaches in the south to cozy mountains in the north, we have a very diverse environment that must be protected at all costs. Here is what I will do as senator to ensure that Voopmont's environment is protected and safe.

- I will create a bill that prevents all companies from polluting our environment by all means.
- I will create a bill that prevents littering in Voopmont, punishable by a 100 credit fine. This fine can be raised or lowered depending on the economic status of our district.
- I will create a bill that lowers the price of bikes in Voopmont, to ensure that we produce less greenhouse gases and help the environment more.

This will ensure that Voopmont's environment is safe and secure. This will also ensure that Voopmont's companies are not taking advantage of its beautiful environment.

Experience

Here is what my experience is in government.

2019: Worked with Tyco, and SillyPossibility to shut down the EPTO revolt.

2020: Became a district judge for Voopmont.

2020: Became the senator of Voopmont, and created over 4 bills and passed 9 district policies in my one term. I became the Senator of

Voopmont later on, and worked on identifying forms of company endorsement. I also created the People's Council, which ensured that the people had their voice heard in government.

I, Syntholion, am running for senator of Voopmont. #Synth4Senate!
