

Who can benefit from a Homeschool Consultation?

- **New homeschoolers:** Starting homeschooling can be a big step and you may not know where to start. While there's tons of information and free resources online, if you need a more personalized experience, I can help! I will look at your specific needs and give you personalized recommendations for your routines, curriculum, and more.
- **Parents considering homeschooling:** Are you interested in homeschooling, but not sure if you can do it? I would love to give you peace of mind that you CAN do this and help get you started off on the right foot!
- **Homeschooling an unreliable, minimal, or non-speaker:** If your child has special needs, the school may be failing them and while there are services and laws in place to help you fight the system, it's exhausting and expensive. If homeschooling is an option and you're interested in taking the plunge, I can help with that decision.
- **Homeschooling a speller:** Do you have a child who is unreliable, minimal, or non-speaking using S2C, or RPM and the school is not supporting them or presuming competence? If you're tired of crying at IEP meetings and ready to cut the cord, I can help.
