

Organized by 2030 Youth Force Vietnam

In collaboration with Goethe Institute Hanoi

Science Film Festival 2021

Workshop Series

07th October 2021

OVERVIEW

The “Science Film Festival 2021 workshop series” is organized under the collaboration of Goethe Institute Hanoi and 2030 Youth Force Vietnam - one of the first and largest youth-led networks in Vietnam that work towards SDGs achievements. Under the theme of “Harmony: Mutual thriving of the human and the Earth”, the series of 7 virtual workshops aims at raising youth awareness about sustainability issues and thus inspiring actions towards better self-care and environmental protection. The workshops will feature movies from the Science Film Festival 2021, followed up by a range of different well-designed group activities and interactive games. Each workshop will run for about 2 hours, on 7 weekend days in October and November, culminating with a Tiktok video-making contest under the same theme in early December to further spread and amplify the message to Vietnam’s youth community.

GOALS

1. To promote the Science Film Festival 2021 to Vietnamese social and youth communities.
2. To educate and facilitate open discussion about the theme “Harmony: Mutual thriving of the human and the Earth”
3. To inspire actions towards better self-care, environmental protection and sustainable development, especially among the youth.
4. To strengthen the partnership between 2030 Youth Force Vietnam, Goethe Institute Hanoi and other communities/organizations in Vietnam that also work towards community engagement, green growth, human empowerment, health and well-being, sustainable development, etc.

TARGET AUDIENCE

Each workshop in the 7 event series is expected to attract 30-50 Vietnamese participants in the age group of 16-30.

The Tiktok video-making contest is expected to create a viral movement that engages at least 200 social media users and indirectly impacts another 30,000 interested audiences following 2030 Youth Force Vietnam's social media channels.

MAIN ACTIVITIES

7 workshop series

Each workshop will be a combination of film-screening sessions and other interactive activities such as small-group discussions, sharings from key-note speakers, sharings from participants, story-telling, drawing, quizzes and games, etc.

Engagement & Publicity promotion

A minigame series of 8 interconnected word puzzles with prizes will be integrated to ensure continual engagement and excitement throughout the 7 events.

After 7 workshops, a Tiktok video-making contest will be launched to increase publicity for Science Film Festival events and further promote the “Harmony: Mutual thriving of the human and the Earth” message.
