

Proposed agenda & Notes

- General updates:
 - Kris: Core issues that affect us
 - Simple inline block placement issue (MVP started by pwolanin)
 - <https://www.drupal.org/node/2724819>
 - Kris: Status update on [page manager](#)?
 - Work focused on getting Panels working with p_m HEAD
 - Frega / David / asplicious: Status update on [layout plugin](#)?
 - Patch to merge into core:
 - <https://www.drupal.org/node/2296423>
 - **Still needs more tests!**
 - Simple documentation fixes committed:
 - <https://www.drupal.org/node/2296423>
 - <https://www.drupal.org/node/2726943>
 - Jakob / mortenson / DyanneNova / yanniboi: Status update on Panels / IPE port?
 - Panels issue to get working with p_m HEAD:
 - <https://www.drupal.org/node/2697587>
 - Japerry: Nothing now, but did talk with EclipseGC about the Wizard stuff
 - “basically, if we can get the patch for wizards moving panels quickly (like.. in the next week), then we should commit that asap.. its blocking forward momentum on the ecosystem, since its broken right now in head”
 - andrewbelcher: Status update on mini-Panels?
 - Not present at time of meeting
 - David: Status updates on Panelizer?
 - Not much new
 - This issue (which is actually a CTools issue) fixes an annoying PHP notice in Panelizer: <https://www.drupal.org/node/2672110>
 - EclipseGC:
 - “yeah, the panels work I’m doing should directly impact the panelizer defaults patch”
 - “I’m even porting a bit of that code into the patch to a.) make it work in PM and b.) make the panelizer patch smaller”
 - Kris / Jakob: Status update on CTools?
 - Nothing new since last meeting
- Discussion topics for this week (switch to hangouts?):
 - None this week

Participants

- EclipseGC
- japerry
- timplunkett
- dsnopek
- DyanneNova

Log

11:58 AM <timplunkett> EclipseGc: dawehner pointed out we'll want to do the same thing in page_manager <https://www.drupal.org/node/2730497>

11:58 AM <Druplicon> <https://www.drupal.org/node/2730497> => REST Views override existing REST routes [#2730497] => 5 comments, 2 IRC mentions

11:59 AM <EclipseGc> timplunkett: hmmm, reading

11:59 AM <timplunkett> either the route we're overriding should have no methods specified, or should specify GET

12:00 PM LennardW|afk → LennardW

12:00 PM <dsnopek> Are forms still submitted to the current page? Or do those go to a central URL in Drupal 8?

12:01 PM <dsnopek> Because I could see this getting "interesting" once page_manager is able to override forms...

12:01 PM <EclipseGc> and embed them

12:01 PM <japerry> heyloop

12:01 PM <dsnopek> Anyway...

12:01 PM <dsnopek> Hi Everyone!

12:01 PM <dsnopek> Here's the notes/agenda for today's meeting:
<https://docs.google.com/document/d/17n8gZhtMPRU6SmVDXjzQN9Tup3bMAZ3kINB24xhQFnU/edit?usp=sharing>

12:02 PM <EclipseGc> seems a lot of us a here already :-)

12:02 PM <dsnopek> As always, please add anything you'd like to discuss

12:02 PM → DyanneNova joined (~DyanneNov@50.240.26.14)

12:02 PM <dsnopek> And (among those who aren't already talking) who all is here for the meeting?

12:03 PM <DyanneNova> here!

12:03 PM <dsnopek> DyanneNova: Thanks

12:03 PM <dsnopek> Well, we have enough folks to start!

12:03 PM <dsnopek> Core status that affects us?

12:04 PM — dsnopek needs to dig up pwolanin's issue

12:04 PM <dsnopek> pwolanin's issue is: <https://www.drupal.org/node/2724819>

12:05 PM <Druplicon> <https://www.drupal.org/node/2724819> => Create experimental module for place block on any page feature [#2724819] => 65 comments, 11 IRC mentions

12:05 PM <EclipseGc> yeah, interesting issue

12:05 PM <EclipseGc> I don't know of any issues that are super important and moving right now

12:05 PM <dsnopek> EclipseGc: Ok, thanks!

12:06 PM <dsnopek> page_manager status updates?

12:06 PM <EclipseGc> focussed on Panels updates to work with PM head

12:06 PM <EclipseGc> making progress

12:06 PM <dsnopek> EclipseGc: What's the issue for that?

12:06 PM <EclipseGc> <https://www.drupal.org/node/2697587>

12:06 PM <Druplicon> <https://www.drupal.org/node/2697587> => Wizard API integration [#2697587] => 19 comments, 16 IRC mentions

12:07 PM <dsnopek> EclipseGc: Sweet, thanks!

12:07 PM <EclipseGc> which is a panels issue

12:07 PM <EclipseGc> but relates directly to PM

12:07 PM <dsnopek> Yeah, I put it under Panels in the notes :-)

12:07 PM <dsnopek> Next up: layout_plugin status!

12:07 PM <dsnopek> There have been some simple contributions to the module description and help text, which I committed

12:08 PM <dsnopek> I'll put the issue number in the notes in a minute

12:08 PM <dsnopek> But the main thing is that that the core patch still needs more tests!

12:08 PM <dsnopek> <https://www.drupal.org/node/2296423>

12:08 PM <Druplicon> <https://www.drupal.org/node/2296423> => Implement layout plugin type in core [#2296423] => 52 comments, 16 IRC mentions

12:08 PM <dsnopek> Next up: Panels status updates?

12:09 PM <dsnopek> japerry: DyanneNova: ^

12:09 PM <dsnopek> And, EclipseGc, if you have anything besides the p_m/wizard integration one

12:09 PM <EclipseGc> nope, that's my focus right now

12:09 PM <japerry> dsnopek: nothing for me. was at oscon last week. Nothing since our meeting the friday of drupalcon (which I presumed was discussed last week?) ... I did talk to EclipseGc about the panels wizards stuff yesterday

12:10 PM <japerry> basically, if we can get the patch for wizards moving panels quickly (like.. in the next week), then we should commit that asap.. its blocking forward momentum on the ecosystem, since its broken right now in head

12:11 PM <dsnopek> japerry: Ok, great, thanks!

12:11 PM <dsnopek> Next up: Panelizer updates!

12:11 PM <dsnopek> From my end, I have nothing really...

12:12 PM <EclipseGc> yeah, the panels work I'm doing should directly impact the panelizer defaults patch

12:12 PM <dsnopek> This issue (which is actually a CTools issue) fixes an annoying PHP notice in Panelizer: <https://www.drupal.org/node/2672110>

12:12 PM <Druplicon> <https://www.drupal.org/node/2672110> => EntityFieldDeriver naive about field info, throws PHP warnings [#2672110] => 16 comments, 2 IRC mentions

12:12 PM <EclipseGc> I'm even porting a bit of that code into the patch to a.) make it work in PM and b.) make the panelizer patch smaller

12:12 PM → marthinal joined (~chatzilla@138.red-83-55-75.dynamicip.rima-tde.net)

12:13 PM <dsnopek> EclipseGc: Awesome!

12:13 PM <EclipseGc> dsnopek: yeah... unfortunately the deriver is all wrong there and will still be wrong after that issue, which is why I've kind of delayed it

12:13 PM <dsnopek> EclipseGc: "all" wrong?

12:13 PM — EclipseGc didn't mean it that way

12:13 PM <EclipseGc> there's crap in core that make it impossible to do this right

12:13 PM <EclipseGc> :-(

12:13 PM <dsnopek> EclipseGc: I know you didn't like the lack of constraints, which we couldn't make work

12:14 PM ⇐ balsama_ quit (~balsama@h138.238.130.40.static.ip.windstream.net) Remote host closed the connection

12:14 PM <dsnopek> EclipseGc: But that wouldn't be a huge code change if/when constraints are fixed

12:14 PM <EclipseGc> dsnopek: yeah, I'll try to look at this today

12:15 PM <dsnopek> EclipseGc: Cool, thanks!

12:15 PM <dsnopek> So, last but not least: CTools status updates?

12:15 PM <dsnopek> EclipseGc: ^

12:16 PM → balsama joined (~balsama@104.247.39.34)

12:18 PM <EclipseGc> nothing since the last meeting

12:18 PM <dsnopek> EclipseGc: Cool, thanks!

12:18 PM <EclipseGc> between vacations, and single issue focus, I've nto done much there

12:18 PM <dsnopek> So, that's all the status updates

12:18 PM <dsnopek> We don't have any discussions on the agenda

12:18 PM <dsnopek> Anything anyone wants to jam about while we're all here?

12:19 PM <EclipseGc> well we could talk more in-depth about what I'm doing for the panels patch if we like

12:20 PM <EclipseGc> but only if people are interested and care

12:20 PM <dsnopek> I can't jump on a Hangout today (or I suppose I could just listen?)

12:21 PM <EclipseGc> again, only if people care

12:21 PM <EclipseGc> otherwise I just keep coding

12:21 PM <EclipseGc> :-)

12:21 PM <japerry> I think its fine to keep coding

12:21 PM <japerry> lets check in either later this week or at the meeting next week

12:22 PM <EclipseGc> ok

12:22 PM <EclipseGc> works for me

12:23 PM <dsnopek> Ok, so it sounds like there's nothing... so, good meeting, Everyone!
