

CONSENT FOR THE USE OF IMAGES, VIDEOS AND INTERVIEW WITHIN THE EUROPEAN PROJECT “Crafts Youth Future Engagement”

The main purpose of the project “Crafts Youth Future Engagement” is to reconnect youngsters between 13 and 18 years old with the sector of professional craftsmanship and to highlight how crafts represent a responsible and sustainable option in the global market.

The project is supported by the Erasmus + program of the European Union.

With the aim of contributing to the preservation of knowledge and crafts activities, part of the project is dedicated to the elaboration and publication of a youth workers guidebook in 7 languages that will produce specific information about what crafts professions are, the links with real markets and resources for youth workers to better support young people in knowing more about crafts.

Other outputs of the project will be a short guide, virtual tours of workshops, an interactive map and a toolkit produced with samples of raw materials in all partners languages.

In this context, the partners of the project are collecting information through a series of interviews with 24 craftspeople, photo and video shooting. This information will be used for the results and will be published on the portal Mad’in Europe and possibly on the websites of partners. It will also be used on social networks to promote the guide and the professionals. You will be welcome to use it for your own communication.

By signing this consent, you authorize to use and disseminate the information (textes, images and video) produced by the partners of “Crafts Youth Future Engagement” on your activity.

In the case of images and videos provided by you for the “Crafts Youth Future Engagement” project, we ask you to authorize us to use them partially or entirely for the purpose of the project and to provide any information concerning the copyright of the images (photographer/film maker). If no information is provided, they will be credited as follows:
