

## BYOD Device Buyers Guide

At Forrest Hill School we recommend **Chromebooks** as our first choice for BYOD. Chromebooks are the number one device in primary schools because they're easy to use, versatile, secure and affordable.

Windows devices:

- Windows 11 will work best. Older operating systems may have problems with our network.
- Ensure battery life is good for the whole school day.
- Make sure the device has strong up to date antivirus software.
- Use a school profile that does not include gaming software, social media or other unrelated software.
- Make sure the device is transported in a protective case.

MacBooks:

- These are an option, however, be aware of the cost compared to Chromebooks.
- As with Windows PC, MacBooks should have the latest operating system and must have a good battery life.

We have a positive history of dealing with [PB Tech](https://www.pbtech.co.nz/). They have a good variety of devices and competitive prices.
