Introduction

Shame has long been discussed in Psychology. Scholars differ in their understanding of its usages and definitions. Lewis and Tangney suggest shame is a weakness, a painful experience that includes a negative evaluation of the.

Method

This is mixed-methods research that tried to construct a psychology measurement of the Islamic concept of shame (*Al-Haya'*).

Results

Explanations of the results will be

Discussions

This study is aimed to develop a Shame instrument by the conception of Islam derived from the Quran and Hadith. Shame by the Arabic language comes from the word *Al-Haya'* which means life.

Conclusion

In the perspective of Islam, shame is an obligatory noble character for any Muslim. It is known as a positive embarrassment.

Declaration

Acknowledgments (if any)

This is a short text to acknowledge the contributions of colleagues, institutions, or agencies that aided the efforts of the authors.

Funding (if any)

This research received no specific grant from any funding agency in the public, commercial, or not-for-profit sectors (or: This work was supported by [Insert Funding Agency Name] under Grant No. [Insert Grant Number]).

Author Contributions

Conceptualization: [Author Initials];
Methodology: [Author Initials]; Data collection and investigation: [Author Initials]; Data analysis: [Author Initials]; Writing—Original Draft Preparation: [Author Initials]; Writing—Review & Editing: [Author Initials]; Supervision: [Author Initials].

Conflict of Interest

The authors declare that they have no known competing financial interests or personal relationships that could have appeared to influence the work reported in this paper.

Use of Artificial Intelligence

The authors declare that no Artificial Intelligence (AI) or AI-assisted technologies were used in the creation of this manuscript (or: The authors used [Specific AI Tool] for [Specific Task]).

Ethical Clearance

The study protocol was approved by the Institutional Review Board (IRB) of [Institution Name] (Approval No. [Insert Number]) and all participants provided informed consent (or: Ethical review and approval were waived for this study as [Justification]).

Data Availability (if any)

The data supporting the findings of this study are available from the corresponding author upon reasonable request (or: All data generated or analyzed during this study are included in this published article).
