

Slab Vase Project

Advanced Ceramics III

All Images from Pinterest.

Essential Questions:

How do artists grow and become accomplished in art forms?

How do artists learn from trial and error?

Objective:

Create a vase from stiff slabs

Products:

A. 1 slab vase

- This must be deliberately created, considering: shape AND refinement: conscious edges, carefully sealed seams
- Your vase should have at least 3 angles along each side
- You should have interesting and deliberate surface treatment (planned ahead and in your sb)

B. Reflections on your intent, results, and effectiveness of your craftsmanship

Process:

1. Watch [this video](#) on creating a stiff slab vase
1. Homework Research: check out slab vases on pinterest, add 20 pins to a new board.
2. Draw 5 ideas and create 1+ template--test LOTS of ideas!
3. Think about your timing. You will need to roll slabs and take care of them so that you can put them together during our next class.
4. Create slip early to be sure you have lots available!!
5. Be sure to seal all edges VERY well.
6. Fire and glaze!

Reminders:

1. Keep your notes as you'll be asked to reflect on your decisions
