

I have worked as a Northern Nurse in rural Manitoba for the past 10 years. During the past year I began working as a Nurse Practitioner in the same region. I have seen how this job position has become more challenging over time whether it be health acuity demands, staffing crisis or limited employee support. I can also see how the union is bound by a collective agreement that has become dated and needs adjustments to keep up with the evolving needs of its professionals.

I am keenly interested in becoming involved with the union to better advocate for nurses and nurse practitioners in this Northern region and help ensure that they are protected and supported. I feel I have the perspective, the experience, and the determination to be part of a cohesive team of professionals advocating for change during this current health care crisis. I welcome the opportunity to be a member of the group executive!
