

Phd position in sustainable health care

Template for project proposal

Please use the headings below for your project proposal. You are welcome to add sub-headings or other formatting. The submitted proposal should be no more than two (2) pages long, excluding references.

Background

[Provide a short background to your proposal research project, including situating this within the relevant literature. If relevant, describe the theoretical framework that your research will draw on]

Aim and research questions

[Outline as specifically as possible the aim of your proposed research and the research questions that will be addressed]

Methods

[Describe the methods you will use to address your research questions, and provide a justification for these. You should detail your approach to data collection and analysis and highlight any important ethical aspects]

Results

[Describe the results that can be expected from your research and how these results will contribute to knowledge in the field]
