

# T10.3 Meeting

Date: 1 October 2018

## **Attendees:**

Diego Scardaci (EGI F.)

Marica Antonacci (INFN)

Stefano Nicotri (INFN)

Pablo Orviz (CSIC)

Daan Broeder (Meertens)

Ignacio Blanquer (UPV)

Enol Fernández (EGI Foundation)

Shaun de Witt (UKAEA)

Sara Ramezani (SURFsara)

## Interfaces between WP10, WP4 and the CHM, RDM and SPM processes

Slides in agenda

Cater for work need to be done on the thematic services in the workflow

Define a step by step procedures for managing requirements

## Status of requirement gathering for the Thematic Services

- Recording requirements in JIRA

- Each 'Support team responsible person' (STRP) should shortly report (5') on the analysis of the TS use cases and on the status of the related entry in the "Community requirement database":

<https://wiki.eosc-hub.eu/display/EOSC/Community+requirements+DB>

*Please, find below the STRP list.*

CLARIN --> Daan

DODAS --> Marica

ECAS/ENES --> Shaun

GEOSS --> Enol

OpenCOASTs --> Pablo

WeNMR --> Baptiste

EO Pillar --> Enol

DARIAH --> Shaun

LifeWatch --> Marica

*- If you are not able to attend the meeting, please, prepare anyway your report, inform me and ask somebody else of the support team to present it.*

*- Information about group membership composition is available at  
<https://docs.google.com/spreadsheets/d/1bdAbH96HxCD-uM4fi3sMKF-Ow8lGeK4MK6q8YP7mt3Y/e/dit#gid=386750247>*

## CLARIN

### Integrating

Created some tickets. Feedback is useful to understand if we created properly. Not clear to who assign the tickets.

## DODAS

Requirements and stories are in confluence. Still to be stored in JIRA. Improve communication between WPS.

Main issues are related to the integration activities → monitoring and accounting (integration of the PaaS with EOSC-hub core services). Need to discuss with the federation tools area. AAI, DODAS leverages on IAM. Integration with Resource providers requires deployment of IAM on resource providers.

## ECAS/ENES

Requirements to be transferred to JIRA. Get more information this week and get updated by DI4R

## GEOSS

Tickets in JIRA. Need to follow them up.

Integration of the service into the EGI infrastructure is ongoing with GEOSS testing Kubernetes deployed at CESNET.

## OpenCOASTs

Most relevant tech requirements in JIRA.

Label with the community name to be added to JIRA?

Direct discuss between LIP people with technical people → to be moved to JIRA

Issues with DIRAC submission. But problems seem to be on the OpenCOASTs side.

## WeNMR

Baptiste not in the meeting

## EO Pillar

Tickets in JIRA. Need to follow them up.

Use cases are progressing. Integration of providers in the EGI FedCloud. Working on running services in the infra.

## DARIAH

Requirements to be stored in JIRA.

No recent news. Shaun has to follow-up.

Lifewatch

The task is blocked

## Supporting other use cases (WP8, WP9, others)

We need to start to organise ourselves to support WP8, WP9 and other communities.

Dependency from CRM

- Leveraging on existing requirement processes from EGI and EUDAT to enlarge our requirement database
- Create a link with the Stakeholder Engagement task (WP3)
- Interface with CRM
- Leveraging on community requirement analysis done in EOSC-pilot (Suggest setting up meeting with Hermann Lederer [lederer@mpcdf.mpg.de](mailto:lederer@mpcdf.mpg.de))

## AoB

- Daan: improve the communication with the other WP10 tasks and WPs.
- T10.3 Monthly meeting → First monday of the month 10-11:30 (5th of November 10:00)
