SECTION-A READING SKILL (20 MARKS)

I. Prose Comprehension- $(10 \times 1 = 10)$

i. adulterated

In these trying times, when buying ordinary foodstuff can burn a hole in our pockets, comes the news that can actually help us save some hard cash when we go out to shop the next time. According to a Stanford University study, a first of its kind in the world, there is no evidence to suggest that there are more nutritional benefits from expensive organic food than those grown by conventional methods.

The researchers add that there is no difference in protein and fat content between organic and conventional milk and the vitamin count is similar in both types. The only benefit is that organic foods are not contaminated with pesticides, but then, before you chew on that plate of organic okra with roti made from organic wheat, they are not 100% pesticide-free either.

In India, organic food has been growing at 20–22% and the export market is valued at `1,000 crores. Obviously, the study is not good news for that sector and for people who are big on organic food.

In India, eating organic food is more of a style statement than due to health worries because the stuff is expensive. But people can, do indulge in not only organic vegetables but even organic eggs laid by 'happy hens', who are allowed to roam around freely, whereas 'unhappy hens' are kept in coops.

Then some companies have installed music channels in their cowsheds and the milk from those sheds is sold at a marked-up price since it has more nutritional value because the animals are happy thanks to lilting 24×7 music. We don't know yet of any farmer using music to improve his crop quality, but then you never know: plants are known to respond to music.

Why such pickiness about food? These days, the huge number of TV shows and articles that we see and read on food provide bread and butter for specialists. But instead of decoding food, its sources, and what has gone into growing it, isn't it much better to enjoy what's on the plate?

Now answer the following questions:
1. According to a Stanford University study, organic food in relation to conventional food is
i. less nutritious
ii. more nutritious
iii. very conventional
iv. as nutritious
2. The study will not be welcomed by
i. farmers of conventional food
ii. makers of pesticides
iii. all sectors
iv. exporters of organic food
3. We can save some hard cash by
i. buying organic food
ii. not buying organic food
iii. going to the shop
iv. not buying food with pesticides
4. Music channels are installed in the cowsheds because the
i. cows give more milk
ii. milk is sold at a higher price
iii. milk becomes purer
iv. workers become happy
5. In the second paragraph, the author's attitude to the people who eat food sourced from 'happy' animals is that he

i. is happy with them
ii. is unhappy with them
iii. is laughing at them
iv. wants crops to be grown similarly
6. One benefit of organic food is that
i. it is fashionable to eat
ii. only rich people can afford it
iii. it is less contaminated with pesticides
iv. even poor people can afford it
7.The word 'contaminated' means .

ii. for adults iii. containing iv. not healthy Fill in the blanks 8. In India, eating organic food is more of a style statement than due to 9. II. Poem Comprehension- (10×1=10) I met a traveller from an antique land Who said:—Two vast and trunkless legs of stone Stand in the desert. Near them on the sand, Half sunk, a shatter'd visage lies, whose frown And wrinkled lip and sneer of cold command Tell that its sculptor well those passions read Which yet survive, stamp'd on these lifeless things, The hand that mock'd them and the heart that fed. And on the pedestal these words appear: "My name is Ozymandias, king of kings: Look on my works, ye mighty, and despair!" Nothing beside remains: round the decay Of that colossal wreck, boundless and bare, The lone and level sands stretch far away.	
Answer the following questions Q1) The poem is set in a. The wilderness	
b. An ancient landc. A palace
