

EE98 Journeyman Electrician

Complex Energy Consulting (CEC) | Farmington, NM | Full-Time

More than just electrical work

CEC is hiring a licensed EE98 Journeyman Electrician who cares about doing the job right, takes safety seriously, and actually likes figuring out tough problems.

Most electrical companies stick to one lane. We don't. Our crews touch residential, commercial, industrial, oil and gas, municipal water, backup power, and controls and automation work. That means the job changes week to week, and so does what you're learning.

If you want a real career with a company that's still growing, where your input actually counts and your work shows up in results, let's talk.

What the job looks like

- Installing, maintaining, and repairing electrical systems
- Reading blueprints, schematics, and technical drawings
- Running conduit and installing panels, transformers, disconnects, lighting, controls, and related equipment
- Troubleshooting systems and tracking down field issues
- Keeping all work in line with the NEC and local code
- Mentoring apprentices and helping bring up the next group of electricians
- Talking with customers professionally and representing CEC well
- Putting together estimates for small projects and service calls
- Handling work orders and job documentation through workorder systems
- Working safely and holding to CEC's standard for craftsmanship

What you need

- Current New Mexico EE98 Journeyman license
- Valid driver's license
- Solid working knowledge of the NEC
- Able to work independently or as part of a crew

- Strong troubleshooting instincts
- Good communication and customer service skills

Nice to have

- Experience across residential, commercial, and industrial work
- Oil and gas electrical experience
- Motor controls and VFDs
- Backup generators
- PLCs or industrial controls
- Solar or EV charging
- Experience leading crews or mentoring apprentices

Why CEC

We're building a company where good people can build real careers. That includes:

- Competitive pay based on experience
- Overtime available
- Health Insurance
- Employee Incentive Program
- Company vehicle (depending on the role)
- Paid training and development
- A genuinely wide variety of work, not the same job every day
- A real path forward, whether that's Lead Electrician, Project Management, Controls and Automation, or Estimating
- A crew that values integrity, professionalism, and getting better over time

Physical requirements

- Lift up to 50 lbs
- Comfortable on ladders and elevated platforms
- Able to work outdoors in all weather

- Able to work in confined spaces when the job calls for it

About CEC

Complex Energy Consulting is a growing electrical and automation contractor working across the Four Corners region. We handle electrical construction and service, industrial controls, instrumentation, backup generator systems, oil and gas support, municipal infrastructure work, and automation solutions.

Our goal is straightforward: give customers work they can count on, and give our people room to grow into something bigger.

If you're a licensed EE98 Journeyman looking for a place where the work actually matters, we want to hear from you.
