1.0 GENERAL INFORMATION

1.1 System Overview

The LogoMaster 3000 is an application that utilizes an intuitive user interface that makes designing and creating logos fast and efficient. This program provides a graphical user interface that allows a user to choose from the given templates, designs, and create a brand new logo for their company.

This program is a modern, yet simple program to design logo, at reasonable price, easy and fast to use. The software contains various shapes and designs for the user, uniquely providing the freedom and the ability to choose whatever shape or design they want in their company logo.

This is targeted especially for those audience who do not have much experience with advanced image processing software, and small businesses who do not have the budget to hire a professional to design a logo.

2.0 ABOUT THE SOFTWARE

2.1 Unique Features

LogoMaker 3000 provides an interesting array of features, which are both exciting and refreshing. Not withholding the user from anything, the user has the freedom and ease to generate any kind of logos they want for their new company. With the new beta release of our new software, one gets the advantages of the following features:

- New Shapes and designs to choose from
- Resizable objects
- Ability to introduce text with shadow effect
- Ability to save the logo straight to the desired position

LogoMaker 3000 is now here to save all the young entrepreneurs from the troubles of hiring designers and paying exotic money for logo designs. They can now create anything they want without having to need any professional help from any technical people.

2.2 Logo making now easier

Logo making, although might seem like something really small and insignificant, is in fact one of the most important and one of the first things that a young entrepreneur decides while starting their new company. The logo does not only define their company, it is a signature of their true self. The existing logo making software in the market, although more diverse are complex to use and do not contain simple and easy designs. Logomaker 3000 now provides rescue to all the small businesses who are looking for the signature logo for their company.

3.0 GETTING STARTED

3.1 Setting up

We first start by downloading JDK in the computer. Any version that is 9 or above would help in using the software with finesse. Oracle provides JDK for a variety of devices, including Linux, MacOS, Windows and Solaris SPARC.

The screenshot shows the Oracle Technology Network website for Java SE Downloads. The page has a red Oracle logo at the top left, a navigation menu, a search bar, and links for Sign In, Country/Region, and a Call button. The breadcrumb trail reads: Oracle Technology Network / Java / Java SE / Downloads. On the left, there is a sidebar with links to various Java products. The main content area has tabs for Overview, Downloads, Documentation, Community, Technologies, and Training. The 'Downloads' tab is active, showing 'Java SE Development Kit 9 Downloads'. It includes a thank you message, a description of the JDK, and a list of links to related resources. Below this, there is a section for 'Java SE Development Kit 9.0.1' with a license agreement notice and a table of download links for different operating systems. On the right, there are sections for 'Java SDKs and Tools' and 'Java Resources' with various links. At the bottom right, there are links to 'E-mail this page' and 'Printer View'.

Java SE Development Kit 9 Downloads

Thank you for downloading this release of the Java™ Platform, Standard Edition Development Kit (JDK™). The JDK is a development environment for building applications, and components using the Java programming language.

The JDK includes tools useful for developing and testing programs written in the Java programming language and running on the Java platform.

JDK 9.0.1 checksum

Java SE Development Kit 9.0.1

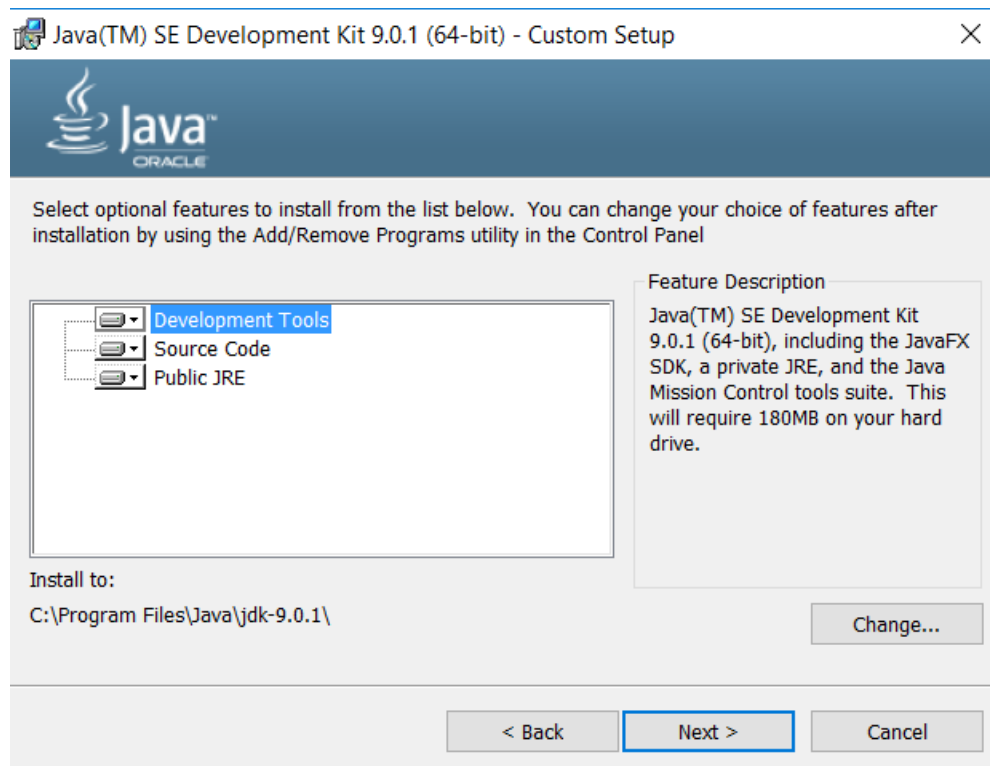

You must accept the [Oracle Binary Code License Agreement for Java SE](#) to download this software.

Thank you for [accepting the Oracle Binary Code License Agreement for Java SE](#); you may now download this software.

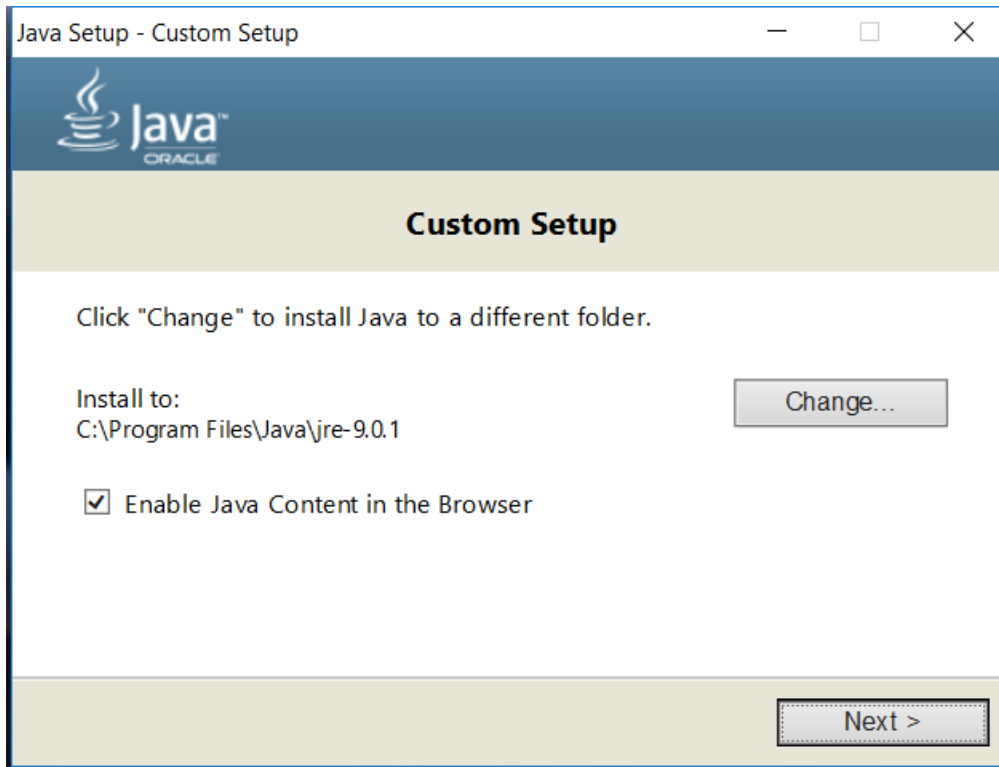

Product / File Description	File Size	Download
Linux	304.99 MB	jdk-9.0.1_linux-x64_bin.rpm
Linux	338.11 MB	jdk-9.0.1_linux-x64_bin.tar.gz
macOS	382.11 MB	jdk-9.0.1_osx-x64_bin.dmg
Windows	375.51 MB	jdk-9.0.1_windows-x64_bin.exe
Solaris SPARC	206.85 MB	jdk-9.0.1_solaris-sparcv9_bin.tar.gz

[E-mail this page](#) [Printer View](#)

LogoMaster 3000 is compatible with all the devices, so download whichever device is suitable. Installer will start the installation process and it will ask for the installation directory for JDK as shown below:

You can choose your own directory for the program, so that it's easier to locate. After JDK 9 installation it will prompt for JRE installation.

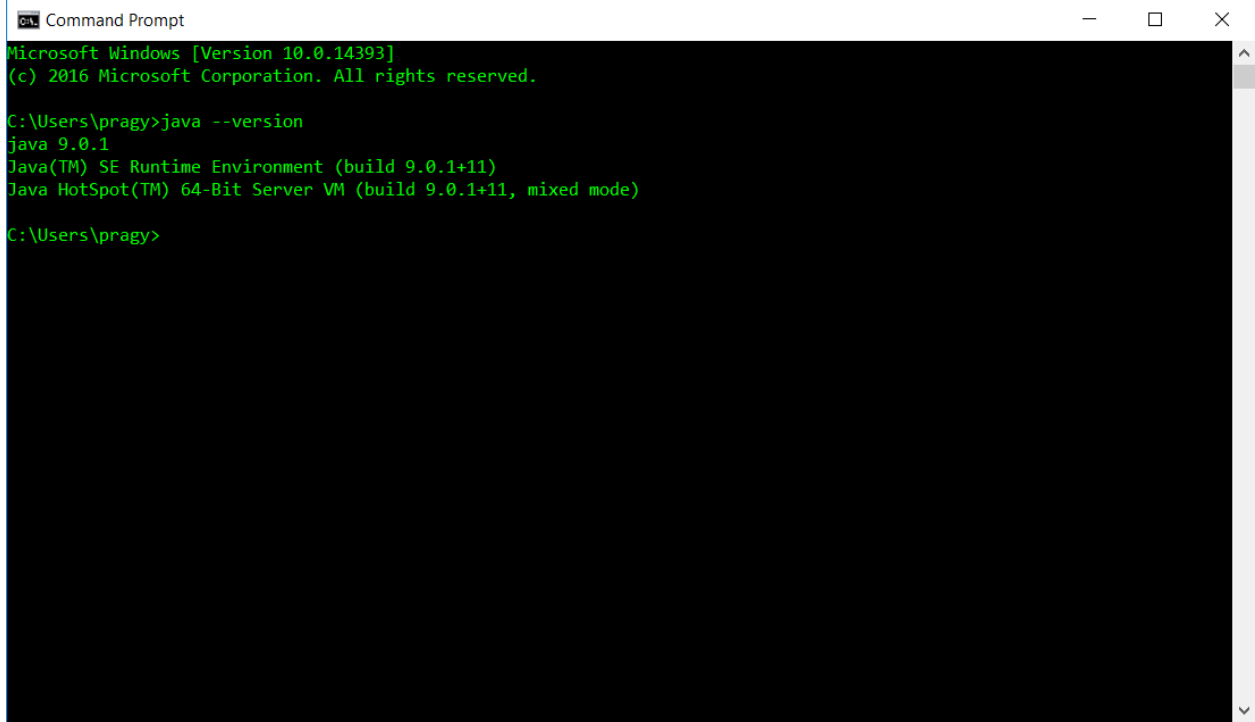

Leave it default and click on Next.

The installation of your program is now complete.

You can also test your version of java. Open the terminal and run `java --version` and it should display 9.0.1 as shown below:

```
Command Prompt
Microsoft Windows [Version 10.0.14393]
(c) 2016 Microsoft Corporation. All rights reserved.

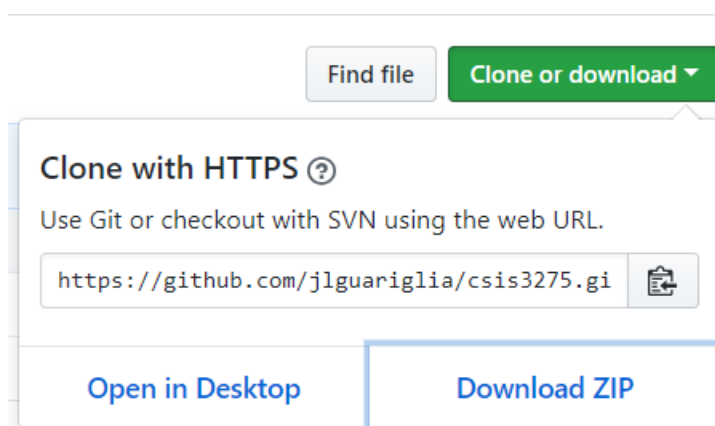

C:\Users\pragy>java --version
java 9.0.1
Java(TM) SE Runtime Environment (build 9.0.1+11)
Java HotSpot(TM) 64-Bit Server VM (build 9.0.1+11, mixed mode)

C:\Users\pragy>
```

3.2 Installation of the software

The software, LogoMaker 3000 is easily accessible on our GitHub repository. It is a simple download;

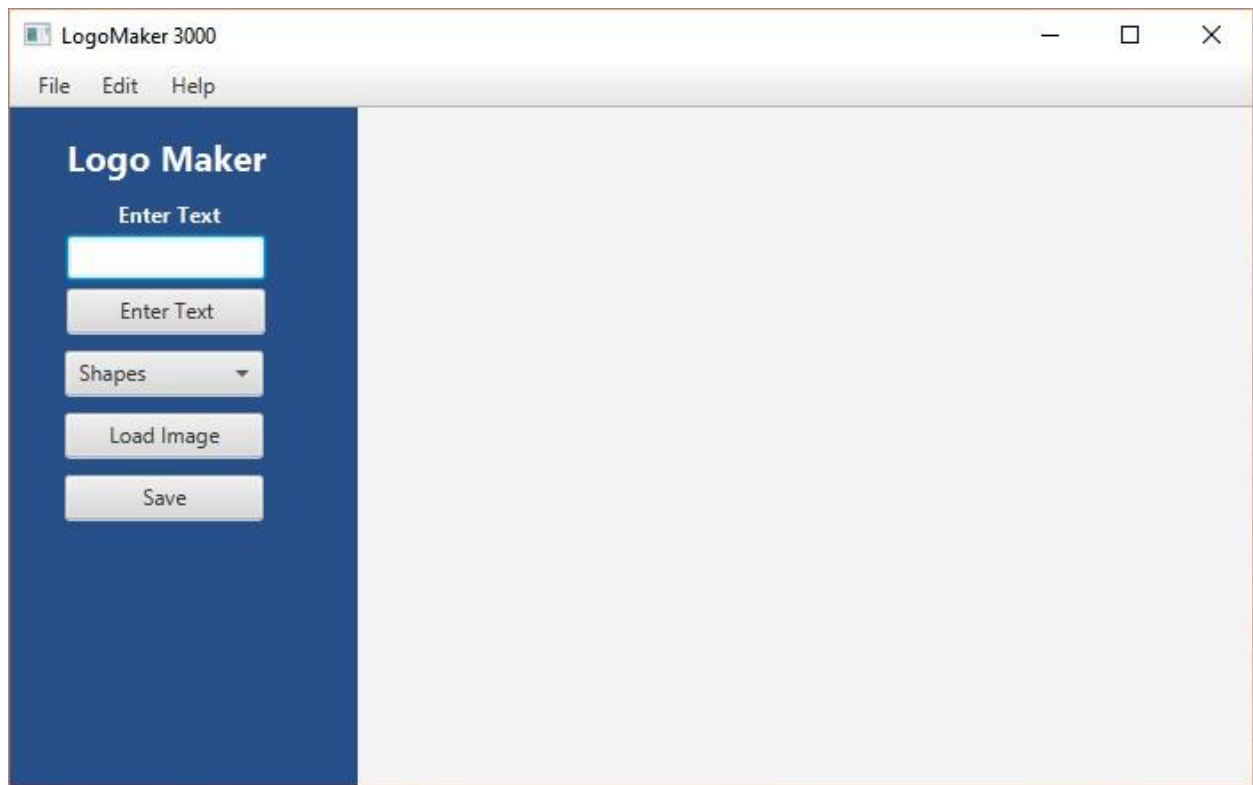

<https://github.com/jlguariglia/csis3275.git>

4.0 HOW TO RUN

This is an actual design of how the software actually looks like. On the left hand side one can find the Enter text button, a button for shapes, a button for load image and another for save.

Also on top left one can find File Edit and Help option, is the user wants to make amendments to the design, to edit or if the user needs help.

4.1 How to enter text

On the left hand side of the program, there is a button for "Enter Text". Enter the text in the text box below, click on Enter Text button to see shadow effect text appear in the middle of the screen. One can easily create a stunning logo with this versatile shadowy effect, without any difficulty.

4.2 How to add shapes

Just below the enter text section is the shapes button, which is a drop down. One can click on that button to see a variety of shapes for option.

LogoMaster 3000 works with simple drag and drop function. So to resize the shape, just drag any side of it and pull until its bigger. Its very easy to use and efficient.

4.3 How to save an image

Once the design is complete and you are happy with it, just click on save image button right at the bottom of the left blue panel. It will ask you which directory you want the image to be saved in, specify the location and you will be able to see the logo right where you wanted.

5.0 FUTURE VERSIONS

5.1 Future features

Upcoming features of the software will be applicable in the next release.

Following are the upcoming features that we are currently working on and which will be available in the future versions of Logo Master 3000.

- Set library of images/shapes will come from a database, which will be regular updated with new items.
- Custom colour for shapes
- 3d effects for text
- More file formats to save logo as (jpeg, pdf, bitmap, gif, etc.)
- Multi-Language & platform support
