

Virtual Kidneys

1. Go to the [Kidney Function](#) website and summarize the short video.
2. Go to [Kidney School](#) and explain how kidneys work and why they fail (use the next button).
3. Go to this [Kidney website](#) and explain the difference between filtering and selective reabsorption. Scroll down and try to beat the time of the day!
4. Go the [kidney animation](#) and explain each of the following:
 - a. The path of each molecule through the nephron
 - i. Urea
 - ii. Water
 - iii. Glucose
 - iv. Protein
 - v. Sodium
