ABOUT

About the School Counseling Department

Mission

The Glenbard East School Counseling Department works with students to improve their knowledge of self and others in order to be prepared to meet the challenges and opportunities they will encounter throughout life. Goals are designed to encourage students' personal, social and academic development. Our curriculum includes adjustment to the high school environment, course selection and four-year planning, college, career and other post high school options, and personal decision making. It is our overall mission to assist students in developing skills and setting goals in order to reach their potential.
