1. LATAR BELAKANG

Pendahuluan harus secara singkat menempatkan penelitian dalam konteks yang luas dan menyoroti mengapa penelitian ini penting dan fakta-fakta sosial tentang fenomena objek penelitian. Bagian ini harus mendefinisikan tujuan penelitian dan signifikansinya. Kondisi terkini dari bidang penelitian harus ditinjau dengan cermat, dan publikasi-publikasi utama harus dikutip. Harap soroti hipotesis yang kontroversial dan berbeda bila perlu. Terakhir, sebutkan secara singkat tujuan utama penelitian dan soroti kesimpulan utama. Sedapat mungkin, usahakan agar pendahuluan dapat dipahami oleh para ilmuwan di luar bidang penelitian Anda. Referensi menggunakan APA Style. (Verdana, size 12, Spacing: before 6 pt; after 6 pt, Line spacing: 1.15, paper A4, margin kanan-kiri-atas-bawah: 4 cm)

Naskah harus diserahkan dalam format file dokumen Microsoft Word (.docx) dengan ukuran file tidak lebih besar dari 2 MB. Naskah diketik dengan spasi 1,5, pada ukuran kertas A4 portrait, rata kiri, tanpa format khusus. Penulis bertanggung jawab untuk memastikan bahwa naskah tidak memuat identitas penulis, kecuali pada Halaman Judul. Seluruh bagian pendahuluan dipaparkan secara terintegrasi dalam bentuk paragraf-paragraf dengan panjang 10-20% dari total panjang artikel

2. METHODS

Metode penelitian harus dimasukkan dalam Pendahuluan. Metode tersebut mencakup penjelasan tentang pendekatan penelitian, subjek penelitian, pelaksanaan prosedur penelitian, penggunaan bahan dan instrumen, teknik pengumpulan data, dan analisis.

3. FINDINGS AND DISCUSSION

The results obtained from the research have to be supported by sufficient data. The research results and the discovery must be the answers, or the research hypothesis stated previously in the introduction part.

2.1. Subsection

Heading 1: use this style for level one headings

Heading 2: use this style for level two headings

Heading 3: use this style for level three headings

Heading 4: create the heading in italics.

Bulleted lists look like this:

- First bullet
- Second bullet
- Third bullet

Numbered lists can be added as follows:

2.2. Figures, Tables and Schemes

All figures and tables should be cited in the main text as Figure 1, Table 1, etc.

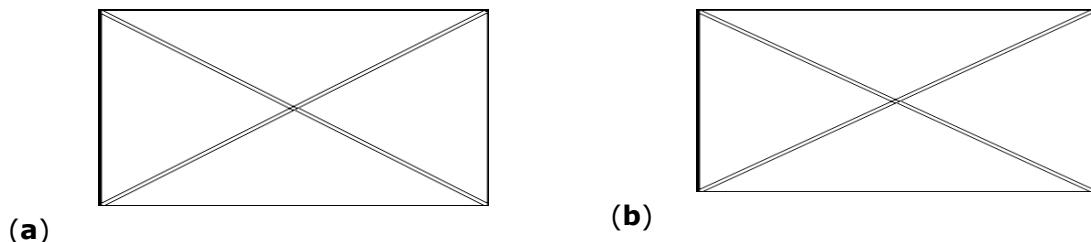

Figure 1. This is a figure, Schemes follow the same formatting. If there are multiple panels, they should be listed as: (a) Description of what is contained in the first panel; (b) Description of what is contained in the second panel. Figures should be placed in the main text near to the first time they are cited. A caption on a single line should be centered.

Table 1. This is a table. Tables should be placed in the main text near to the first time they are cited.

Title 1	Title 2	Title 3
entry 1	data	data
entry 2	data	data 1

¹Tables may have a footer.

2.3. Formatting of Mathematical Components (if any)

This is an example of an equation:

$$a = 1, \quad (1)$$

the text following an equation need not be a new paragraph. Please punctuate equations as regular text.

Theorem-type environments (including propositions, lemmas, corollaries etc.) can be formatted as follows:

Discussion: The discussion is highlighted through the title and subtitles of the section when needed

Authors should discuss the results and how they can be interpreted from the perspective of previous studies and of the working hypotheses. The findings and their implications should be discussed in the broadest context possible. Future research directions may also be highlighted. The following components should be covered in the discussion: How do your results relate to the original question or objectives outlined in the Introduction section (what/how)? Do you provide interpretation scientifically for each of your results or findings presented (why)? Are your results consistent with what other investigators have reported (what else)? Or are there any differences?

4. CONCLUSION

The conclusion should answer the objectives of the research and research discoveries. The concluding remark should not contain only the repetition of the results and discussions or abstract. You should also suggest future research and point out those that are underway.

Acknowledgments: In this section, you can acknowledge any support given, which is not covered by the author's contribution or funding sections. This may include administrative and technical support, or donations in kind (e.g., materials used for experiments).

Conflicts of Interest: Declare conflicts of interest or state "The authors declare no conflict of interest." Authors must identify and declare any personal circumstances or interests that may be perceived as inappropriately influencing the representation or interpretation of reported research results.

We recommend preparing the references with a bibliography software package, such as Mendeley, EndNote, Reference Manager or Zotero to avoid typing mistakes and duplicated references. Referral sources should provide 80% of journal articles, proceedings, or research results from the last five years.
