

RULES:

- please make the canvas 1920x1080
- no greenscreen transitions UNLESS you have spoken with the person before/after your part and you have agreed on that transition!
- this map is beginner friendly!
- AMV and PMV are both welcome
- don't argue over parts or anything, if you want a taken part feel free to apply for backup!
- codeword is what character you wanna use and why! (ex. im using swiftpaw for part 25, because i think the lyrics fit his feelings towards bluestar)
- every character can be used twice by different people (im using swiftpaw and cinderpelt, which means one more person can use those two! i will be putting a list of how many slots are open for a character in the discord server)

character designs will be made by me and my co-host cloudy (wowza-whisker), but since we don't know what characters people will use, designs could take up to a day to get back to you! it likely won't take that long, but it depends on how busy we are at the time! please don't start your part without the design, we want designs to be cohesive if possible ^^

thank you for reading!!
