

Basic Vietcong team kit guide

Gear.

Type 56 chest rigs “chicom”, SKS chest rigs, Type 56 RPD drum pouch, and M1956 webgear (captured). M56 gear was used both as complete sets and also as a standalone belt with 1~4 pouches of US or Chinese manufacture attached.

Clothing.

AO Baba is the name of the garment used by the Vietcong. Most commercially available options as seen on the right are incorrect. I suggest heading to goodwill

and finding a black/khaki/green dress shirt that resembles the images above. Large collar and two front pockets. As for pants, black drawstring pants with a loose fit.

Head gear.

Boonie hats, pith helmets, rice hats and no head gear are acceptable.
