EDULOG PARENT PORTAL LITE LETTER

Dear Parents:

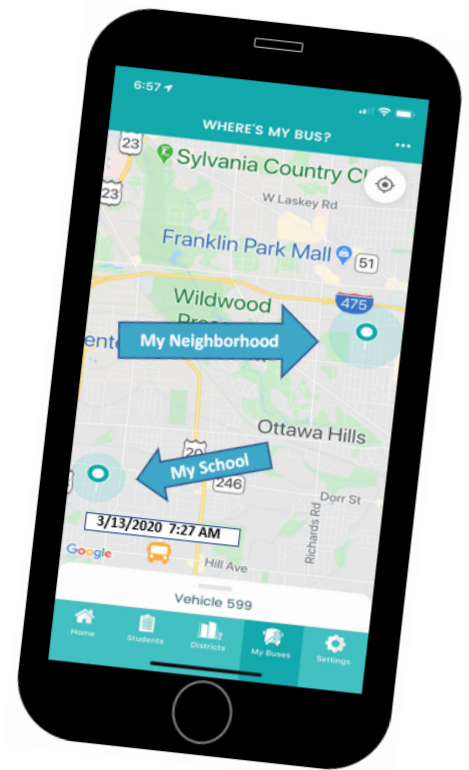

We are pleased to announce that our school district provides a smartphone app to help you receive more information about your child's bus ride. The **EDULOG PARENT PORTAL LITE** app allows you to see real-time information about your child's school bus's location and receive notifications when the bus is getting close.

Your child's safety and security are most important to us, and we want you to have peace of mind knowing that the bus arrived at school or the bus stop in the afternoon. We know that time is precious in the morning, and you must know when the bus is approaching. The Parent Portal Lite APP helps manage busy mornings.

Our school buses are equipped with GPS to help our transportation department locate buses as necessary for routine maintenance and assist in the event of traffic or weather-related issues. That same GPS signal reaches the app, giving you information about your child's bus.

Users can set alert zones at the school and surrounding home neighborhoods to receive notifications on their phones when the bus arrives in that area. The size of the notification area, the time period you want notifications, and the number of alert zones are up to each user.

The registration code for your child's school is **25017390**. You will need this information to begin using the app, which can be downloaded using these QR codes.

Please carefully review the
information on the app, and refer to
the district web page:
