What Happens If I Rub My Eyes After ICL

Rubbing your eyes is never a good idea even if you haven't had a procedure. We'll ask you to avoid rubbing your eyes for the first three to five days after your EVO Visian ICL surgery. The ICL is placed within the eye, thus touching the surface won't bother it.

Will I wear glasses after an EVO Visian ICL procedure?

Our goal is to have you out of glasses after your EVO ICL procedure. In rare cases, there may be residual myopia, hyperopia, or astigmatism after your procedure. If this happens, we can correct that as well so you won't need glasses afterwards. Schedule your consultation today to find out if you are a candidate for EVO Visian ICL.
