

	ACCIDENT PREVENTION AND CONTROL Toolbox Talks
--	---

Accident Prevention and Control

Overview:

- This talk will cover
- causes,
- costs
- Prevention of accidents.

Causes of Accidents:

- Workers/employees do not think about what they are doing.
- Unsafe acts and unsafe conditions
- People are not following safety instructions as per conditions.
- People not following safety measures as per induction/training they've been given by the safety personnel.
- Various unsafe acts and activities such as unsafe manual handling, loading, stacking, and storing.
- Overloading of electrical sockets
- Improper and unsafe installation of electrical installations for electrical appliances
- Overloading of working places, scaffolding, hoists, etc.
- Incorrect uses of plant and machinery or handheld electrical devices/equipment.
- Use of faulty and unsafe electrical equipment with improvised repairs.
- Illegal removal of safeguards (protective guards on the electric grinder, cutters, etc.) and barriers.
- Not following and Ignoring safety signals, signs, and warning devices.

The Cost of accidents to you:

- Severe Pain, suffering, and continuing partial or permanent disability.
- Loss of earnings/salary deductions, job loss.
- Additional financial losses/expenses due to disability.
- Incapability for the job and your relaxation/comforts activities
- Unable to help and financial family support.

Accident Prevention:

- Don't remove or bypass safety guards from dangerous electrical machines/devices.
- Don't handle or work with chemicals, or substances if you are not sure about the hazards.
- Don't use any device, or machines if not well-trained, skilled, or competent, and follow instructions.
- Always comply and practice with safe working practices.
- Wear and use essential PPE correctly, don't abuse it
- Don't try and practice direct compressed air at yourself or others, it is very fatal and kills.
- Always keep good housekeeping, and never mess around while working.

--	---

- Don't use defective equipment or machinery.
- Take extra care of your health. Wash and clean your hands to remove hazardous substances from your skin.
- Report unsafe conditions or unsafe acts (if by your teamwork fellow) to your site supervisor.
- Always use the right tool/equipment for the right job and avoid horseplay.
- Comply with the company's HSE policy, and abide by all HSE rules and signs

Do you have any questions for me?

Note to Supervisor:

Now inform your workforce of the company policy regarding the following:

- Manual handling.
- Work at height
- Work on elevated platforms
- Electrical safety
- Ladder safety
- Work in extreme weather conditions
- others

Do you have any questions for me?

REMEMBER!

"IT IS YOUR LEGAL, MORAL AND SOCIAL OBLIGATION & RESPONSIBILITY TO WORK SAFELY AND REPORT INCIDENTS & ACCIDENTS WITH NO DELAY!"
