

Privacy Policy for Root Checker

Last Updated: 15.09.25

This Privacy Policy describes how Root Checker ("we," "our," "us," or the "App") collects, uses, and discloses information from your device when you use our service.

By using the App, you agree to the practices described in this policy.

1. Information We Collect

Your privacy is our highest priority. Our App is designed to function primarily locally on your device. We do not collect any personally identifiable information. The data we access is solely for the purpose of providing the core functionality of the App:

a) Information about Installed Applications:

To provide features like the App Manager, Security Advisor, and Data Cleaner, we retrieve a list of applications installed on your device and their metadata (such as app name, package name, icon, and requested permissions).

Important: We do not read or collect any personal data from within your other apps (e.g., your emails, messages, contacts, or photos).

b) Device and Hardware Information:

To power the "Device Info" section, we access technical, non-personal information about your device, including:

CPU, RAM, and storage status.

Display and battery information.

Android version, device model, and manufacturer.

This information is purely for display to you on your device.

c) Root Status Information:

The Root Checker feature analyzes your device's root status by checking for the presence of system files and properties (e.g., su binary, build tags).

2. How We Use Information

All information accessed from your device is used solely for the following purposes:

To Provide Core App Features: To show root status, list applications, calculate cache, analyze security risks, and display device information.

To Improve User Experience: To provide you with clear and actionable insights about your device.

All analysis and processing happen locally on your device. No information is ever sent to our servers.

3. Information Sharing

We do not sell, trade, or share any of your information with third parties. Since we do not collect any data, there is nothing to share.

4. Permissions Required

Our App requests certain sensitive permissions to function correctly:

android.permission.QUERY_ALL_PACKAGES: This permission is essential to power core features like the App Manager, Security Advisor, and Data Cleaner. Without it, we cannot retrieve the list of installed apps on your device.

android.permission.REQUEST_DELETE_PACKAGES: This permission is required to provide you with the functionality to uninstall other applications from within the App.

We use these permissions only for the stated purposes and for no other reason.

5. Data Security

Your privacy is our top priority. All information processed by this App remains on your device and never leaves it. We do not maintain any servers, and therefore, your data is not stored or transmitted outside of your device.

6. Children's Privacy

Our service does not address anyone under the age of 13. We do not knowingly collect personally identifiable information from children under 13.

7. Changes to This Privacy Policy

We may update our Privacy Policy from time to time. We will notify you of any changes by posting the new Privacy Policy on this page. You are advised to review this Privacy Policy periodically for any changes.

8. Contact Us

If you have any questions about this Privacy Policy, you can contact us:
