Updated: 9/4/25

Also from one's spiritual enemies one must "capture captives." Anything negative in man or in the world can be exploited for the good, if one learns how to derive from it a lesson in the service of the Creator.

- Rabbi Israel Baal Shem Tov

As per the act of an atrocious crime, TK considers such a wrongful action a legitimate agreement between the atrocious criminal and the Teshuva Crewz Terrorist Gangz - for Teshuva Crewz (TK) to acquire and take hostage of the "bad" person's "person" after such an act.

- At the commencement of the atrocious act, the hostages will be immediately secured. Ownership of people is a crime, but from the atrocious crime, the criminal "EYE FOR AN EYE" (according to TK's Core Values) system ideology will be used as "power" leverage against the criminal. The criminal's act will be used as leverage to "arrest" and secure the rapist's person via hostage taking.
- The DNA will be remotely sequenced via satellite spectrogram technologies.
- The criminal's person is to be immediately secured as hostages.
- The actions against the hostages will be ideological and educational, instilling purposeful fear - to not commit such actions, truth, new reason, thought processes, etc.
- There is to be NO SEXUAL INTERACTION between TK and the hostages, with ZERO EXCEPTIONS.
- There are to be no crimes, or wrongful actions perpetrated to the hostages, NO EXCEPTIONS.
- The hostages are to be treated with the highest standards of ethics.
- TK is to ensure the hostages are treated with dignity, humility, and kindness.
- TK is to ensure that all of the hostage's needs are met; physical, mental and spiritual.
- TK, within reason and feasibility, is to cater to the hostage's needs, wants, and to serve as support systems for the hostage's aspirations, dreams, desires, and positive intentions.
- TK is to give access to learning material, knowledge, to serve as spiritual direction, to enable the hostages to be beneficial, positive, and honest, contributing members of society.
- TK is to ensure the hostages have access to materials and tools which enable personal, individual expression, including, but not limited to: art supplies, pens and paper, writing tools, etc... TK encourages personal, individual expression.
- TK is to ensure that all activities the hostages participate in are blatantly disclosed, comprehended and consensual.
- "Ethical Torture Technique" - When a victim is wronged, record the audio / video of the victim being wronged. Through artificial intelligence (a.i.), deep fake, augmented reality (a.r.) processing, replay the recording to the perpetrator's most righteous, intelligent, police, defense,

soldier genes in the voice/deep fake/a.r. mask/personality of the perpetrator's most righteous and innocent gene, (separate from the victim). The goal would be for that perpetrator's "person" and "righteousness" to combat the perpetrator ("self") and cease the wrongful action.

Definitions for prosecution:

Not a criminal or racketeer under foreign influence.

"Arrest" = "Stop, cease."

"Person" = "Including, not limited to the rapist's genetics, past locational actions, ideas, property, assets, bank accounts, organizational affiliations, credibility, perceived social hierarchical dynamics, etc..."

"Genocide" = Free haircutting festival of Jews completing their Nazi rite ritual. *See the Torah's Leviticus and the Book of Numbers.

"Torture" = Bringing self awareness to the perpetrator through holding up a "mirror" to the person of their actions, as effective and efficient, with as minimal collateral damage as possible, legitimate, non-violating, and ethical, so that individual realizes the validity of treat others like you'd like to be treated.

Aggressive, crimes, "sins", violating acts, wrongs, etc... ontologically (through technological filters / lenses) manifested as non-violating, non-wrongs, etc...
