Marketplace (for next time):

- https://bugzilla.mozilla.org/show_bug.cgi?id=1082027

Nominations--potential goodfirstbugs:

- https://bugzilla.mozilla.org/show_bug.cgi?id=1220899
 - Potential new good first project. Would need ddurst to break into separate bugs w/ mentors and explanations, and provide enough resources to code review.

AMO:

- https://bugzilla.mozilla.org/show_bug.cgi?id=548509 part of the rewrite, lets ignore

Discussion

=====

Marketplace:

- Marketplace bugs: ddurst to ping people who have not commented on their bugs for a few weeks, let them know we will release them if they don't work on it in two weeks. Then blast FB group in two weeks letting them know goodfirstbugs have been released
 - We need to code review when we ping people, ie:
https://bugzilla.mozilla.org/show_bug.cgi?id=1036177
 - Wil to make sure we schedule time to code review before further NI'ing
- can we triage some bugs of curation tools?
 - check the triage list :)
 - Triageed, except for the MP ones bc the session already ended. Will get them next time

AMO:

- Any to publish new sources of add-ons goodfirstbugs
- Andy to start asking for contributors to recognize in his weekly meetings
- What is the difference between these two queries? <http://mzl.la/112duPv> and <http://mzl.la/110i8my>

Updates

=====

- All Marketplace gfb updated with NIs to the last relevant contributors, notifying them with "Any progress on this? If this is still unchanged in two weeks, we'll unassign it." (and more specific details when warranted, like when there's already a PR with comments, or a revert for some other reason).
- Should we start triaging <https://github.com/mozilla-jetpack/jpm/issues?>
