

HYGN 2316: Clinic Forum Topics

Date	Question or Discussion Topic
Jan 14	Can you post the chart we used in pain management by Rebecca Tia to the 'additional resources' tab in the course so we can refer to it more easily when doing in clinic A D4 did my patient's CTP in the hygiene chair. The IPE note was made by the D4, but they did not get it swiped by the dental instructor. I asked the D4 if the note is supposed to be swiped by their dental instructor, but they said no and that our hygiene instructor was supposed to swipe it. My instructor and I were not sure about who is supposed to approve this note, therefore we left it unswiped for now. Who is supposed to approve these notes? Outreach patients - I think a couple of us have been assigned outreach patients that don't have any contact information and even when you reach out to the contact provided they are not able to help. In my case the note on file from the dental student said that the patient is not able to be located at this time and the contact thinks they may be houseless. How do we go about this The DCS google document for clinic has been acting up lately, is it possible to get this fixed so that it will work properly for future clinics?

Jan 28	HC funds are taking a long time to get approved. This has been affecting our scheduling because if the form doesn't get approved before the patients last appointment they have to make payment. And when patients know there's a chance they don't have to pay they're going to wait it out. Because of this long waiting period (it's been close to a month) is it possible that the front desk allows the patient to leave without paying and then contacts them if they need to come back?

Feb 11	Sabrina said it is still 3x contact attempts for OHAF patients Social Worker let Nicole know to send the patients a LETTER IN THE MAIL. I spoke to Sabrina and she said that we are not going to be doing that so idk how to reach out to these patients....? Very limited patient pool right now -very difficult to book patients

	CCC patients???
Feb 25	Any updates on the OHAF fund? I have a possible CCC that would benefit greatly with this fund.

Mar 11	Is it possible to share a patient with a classmate? For example, one classmate needs 0.25, and I need 0.50 to count for a patient, so is it possible to share one so we can both fulfill our patient fraction count? Only 1-2 windows open at the end of clinic. There has been long lines of 5+ people including dental students. Waiting 10+ minutes sometimes for check-out with patient. Frustrating to see people in CSS with their window closed with there is a long line of patients. Some instructors review the digital case summary and some check in with us everyday to get the information that's already on there. It's a little inconvenient to log into axium to get all the information for that summary if its not being reviewed

Apr 1	Are we required to include classmate LA requirements under the patient numbers? Or just filling out the very last page of the clinic progress report is enough documentation for this LA requirement? Do we have to include pedo as part of our patient #'s on umlearn like last term?
