

F and P Scores in Powerschool

Beginning this year, F and P scores will be input into Powerschool. The possibility of a field on the report card is being worked on. Further discussion on this is necessary.

By placing the scores in Powerschool, principals will be able to pull a report by grade level of numbers/percentages of students performing at each level as will be reported to the board. Specific data can also be pulled through quick export and additional reports can be developed. Heidi will visit an elementary principal meeting in the future once data is entered to walk them through pulling a report and answer any questions.

For Teachers:

Open Grade Book:

1. Choose Elem -- Reading
2. Check Term
3. Choose final grades
4. Input F/P letter score in score column

Other notes:

Comment column is being worked on: would a generic comment choice be best or would teachers like an open comment field?

Teachers can enter the score at any time and can change the score at any time up until the final scores for the term has been submitted. At that time, whatever score was last entered will become part of historical data for the student.
