

American Studies 1
Unit 1-Colonial America
The Original 13 Colonies

For the last couple of days, you have been doing research on one of the the original 13 colonies in an attempt to answer one or more of the following questions:

1. What makes the colony of _____ unique or different from the other colonies?
2. Why were “settlers” attracted to this particular colony?
3. What was life like in this particular colony?

Now, using the information that you researched, choose one of the following ways to “present” the research that you found. For this first project you may choose the method of delivery for this “final product.”

1. You may write a 1-2 page paper that address one or more of the questions listed above. Papers should be cited, double-spaced, 12 point font. A works cited page should be included.
2. You may create a google presentation that will be shared with the class. The presentation should have a minimum of 5 slides and each slide should include a title, a picture, and 3-6 bullet notes of information. Works Cited should also be included.
3. You may do something creative. Using a digital tool online, you could create a real estate advertisement for your colony that attempts to “sell” real estate in the respective colony.
